Dear Jim:

At Doug's request, I am forwarding several curve sets covering the relative evaluation of AEL and SAGE Laboratories crystal holders. The curve data is in very rough form in the sense that it represents a direct translation of measurements to laboratory-type curve information, but I am sure that it will meet your immediate needs. No particular significance is to be attached to absolute sensitivity indicated by this set of measurements, but relative sensitivities are fully significant.

Sincerely,

*Burt*
