CMCC Doc. No. 151.664

Copy 1 of 2

Page 1 of 1

Dear Herb:

We are forwarding herewith lists, in quadruplicate, of ASTIA documents that we should like to secure. It would be particularly useful to us if the Stanford University report on Low-Frequency Navigation Systems, and the Harvard University report on Low and Very Low Radio Frequency Sky-Wave Field Intensity could be secured at a very early date.

We have not yet received any of the ASTIA documents which were requested on ASTIA order forms sent to you on 21 June 1955, and it would be most helpful to us if you could do everything in your power to speed up the procurement of this material for us. Many of the reports requested contain information on the development of techniques which could prove of considerable importance in the development of the systems on which we are working currently.

Sincerely,

Burt
