RUMANIA

20 August 1936, "Jugoslawische Jurier," No 182

Production of crude oil in Rumania averaged 5.2 million tons per month in 1935, or 62.4 million tons for the year.

There are about 20 fairly large petroleum companies in Rumania, only six of which are able to operate on a really large scale; these include:

"Shell," with English and Dutch capital

"Standard," with American capital

"Steaus Rumania," with French, German, and English capital

"Credit Minier," with French and Rumanian capital

"Conecrde," with Belgian capital

11 to 12 percent of total production must be delivered to the State.
