US-CHIANG DIRECT ANTI-COMMUNIST PROPAGANDA AT OVERSEAS CHINESE
 Nan-ch'iao Jih-pao, 14 Apr 50

Hong Kong, 10 April (Special Nan-ch'iao Correspondent)

Hong Kong has recently become a headquarters for American imperialist and pro-Chiang reactionary propaganda and espionage activities. In the realm of propaganda their tactics seem to follow a well-contrived plan. In addition to manufacturing countless false rumors, they are printing a wide selection of pamphlets for dissemination here but more especially in such areas as Singapore and Malaya where large concentrations of overseas Chinese exist.

The publishing organ of these pamphlets is known as the "Voice of China Publishing Association" with headquarters in the United States. Pamphlets bearing titles like "Chinese Communism Must Fail" and "Counter Attack Shall Bring Victory" are published in Hong Kong on good grade white paper and the greater portion shipped to the South Seas, with ^a Singapore, which has an office at 95C Ao Nan Road, as a sort of re-routing headquarters.

Not content with this, American and KMT agents are on the job night and day in Hong Kong and Macao manufacturing all kinds of malicious stories intended to arouse in the hearts of overseas Chinese a deep-seated hatred and distrust for the principles of New Democracy and the Peoples Government.

The United States recently lavished a cool 100,000 US dollars ~~turning it over to~~ Chiang Kai-shek for use by his Ministry of Propaganda. ^{Some} ~~A portion~~ of this money is already in Hong Kong in the hands of Chiang's special "cultural" agents who are inventing absurd rumors. In addition to this rumor-mongering, their repertoire includes a wide assortment of terrorist activities which they have practiced in Hong Kong, Macao, and several other locales.

The US government has not stopped at providing the KMT with planes, bombs, and other weapons of destruction, but along the borders of South ~~China~~ the program of assassination practised by Chiang and the US during ^{World War} ~~WW~~ II has been revived.

A special terroristic organ, the "Sino-American Cooperative Office" supplies Chiang's underlings with rifles and other instruments of war and schools them in techniques of terrorism.

According to local papers, no less than 70 of these special Chiang-US sponsored operatives have been active in Macao, Hong Kong and the Chu Chiang area during the past three months. Moreover, about a month ago a certain American [name not given, ~~is~~ substituted] organization which had moved from Canton, after its liberation, to Hong Kong conducted an investigation among Chinese students who have returned from study in the US.

The results of this investigation were never made public by the American agency, but naturally no one need be told what their findings were.

Then, operating in ~~American~~ under the direction of the US State Department, two treacherous war criminals, T.V. Seong and H.H. Kung used the blood money squeezed from the Chinese people to finance the activities of special agents of the reactionaries.

Those tools of ~~American~~ imperialism are working their wiles throughout various sections of the Chu Chiang area only to hasten their own defeat.

But, considering that less than 2 years ago Chiang had an army of 4 million on the Chinese mainland, need we worry about a crew of ~~American~~ paid lackies outside pounding on New China's great gates with a handful of pamphlets.
