**ALL ETHNIC PEOPLES WITHIN THE NATION UNITE TO SMASH THE CONSPIRACY  
OF AMERICAN IMPERIALIST AGGRESSION**

Ever since the imperialistic powers entered China, they have sought to exploit the differences among the minority races in China to further their own nefarious schemes. The former rulers of the country were only interested in exploiting the minority nationalities; consequently, these minorities had only hatred for the ruling classes. Unfortunately, some of the minority nationalities, such as the Tibetans, believed that in following the schemes of the imperialists, they could escape the oppression of the reactionary rulers. What they did not realize was that all the actions of the rulers were inspired by the imperialists.

The minority races have now learned that only under the leadership of the proletariat can real liberty and equality of treatment be **achieved**. Just as these blessings are inherent in the rule of the proletariat, so were inequality and oppression inherent in the capitalistic system of a government. Do not the inequalities suffered by the American negroes and the fast disappearing American Indians attest this fact incontrovertibly?

Since the revolution took root on the mainland, the minority nationalities have really learned what liberty means. The 41 ethnic group delegations and cultural demonstration teams that attended the celebration of the second anniversary of the People's Republic of China found, for the first time in their life, what equality of treatment means. Always before, they had come to Peiping only as captives or tribute bearers. The other people of China also learned from the demonstrations of their culture provided by

the demonstration teams that they were nowhere as backward culturally as the reactionary rulers of the past had led the others to believe. The appearance of these delegations in Peiping had a marked result; they were the symbol of unity of the minority nationalities; they represented the glorious future of our country which is made up of many minority nationalities and ethnic groups.

With our neighboring Korean brothers, who are now fighting against our common enemy, we would like to suggest a slogan of unity: "Let us unite to shatter the secret plans of imperialist America". It is quite apparent that the trouble started in Korea is but one part of a world-wide aggressive plan of the American imperialists. Ironically, however, imperialistic countries are at odds among themselves; they are fearing the rising tide of revolution throughout the world and in their desperate plight are now arming Japan and Western Germany. The valorous Korean people have struck them a severe blow, not only in defense of their country but on behalf of the peace loving people of the Far East and the world.

The imperialists held a false view once that the Chinese Communist Party could not govern large cities and could not cope with the complicated economy of a metropolis. They have since discovered that they were wrong, which, in turn, has filled them with inordinate fear. They will surely continue to stir up the animosities that have been subsided among the various ethnic groups by utilizing special agents and evil elements. Their activities in Sinkiang as shown by Osman, in Mongolia by Prince Te, etc., have revealed their schemes. This can be further supported by their activities in Tibet

which delayed greatly the liberation of this area. It is certain that they will continue to make trouble among the minorities and against this, we must ever be on the alert.
