through the main See No 13 Enclosure (A) without using the pumphouse, but usually, "Reydtanker" Shipping Company vessels do not have their own pumping facilities, the only exception being the 800-ton capacity tanker "Cheleken" which does have pumps. 50X1

5. The pumping section consists of four horizontal steam piston pumps (two in use and two in reserve) with a capacity of 200 tons an hour, located in a one-story, white brick building. The boiler room is located in a white, brick building See No 5 Enclosure (A) located about 100 meters from the pump house. The boiler room has two return tubular boilers which send steam to the pumps via the pipe indicated by No 6 Enclosure (A). A building containing a chemical laboratory No 4 Enclosure (A) for investigating the composition of incoming petroleum products is located between the boiler room and the pump house.
7. Reservoirs at the base are of two types:
- 15 large reservoirs with a combined capacity of about 150 thousand tons, See No 3 Enclosure (A).
 - 14 small reservoirs with a combined capacity of about 30 thousand tons See No 15 Enclosure (A).
- All the reservoirs are of a dark color. There are no fences or enclosures anywhere around the base.
8. A one-story wooden structure See No 14 Enclosure (A) is located on the beach near the reservoirs and contains the offices of the "Reydtanker" Shipping Company (of the Gurev Marine Agency) and the Gurev Directorate of "Glavneftesbyt". The same building contains the dispatcher and transshipment point of the base. The pipeline See No 1, Enclosure (A) leading to Plant No 441 is 400-450 mm in diameter and about 30 kilometers in length. It lays on the surface on the island and in the water is placed on the bottom which nowhere exceeds 0.5-0.8 meters in depth between Bolshoi Peshnoi Island and the mainland.
9. The island also has the following installations:
- The island light-house See No 8 Enclosure (A) a wooden skeleton tower about 25 meters high. A mast with a yard for storm signals has been installed on the tower. A one-story adobe house is located beside the tower.
 - Light-house village No 9, Enclosure (A) consisting of eight one-story adobe houses.
 - The island village No 2, Enclosure (A) consisting of 20 small, one-family one-story adobe houses.
 - Estate No 16, Enclosure (A) belonging to Sevostyanov, head of the Bolshoi Peshnoi Island transshipment point (belonging to the "Reydtanker" Shipping Company). The estate consists of a one-story dwelling unit and two sheds, all of adobe.
