THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1

50X1 1. [Redacted]

The title of the central weather service is "GUAMS VVS". When translated, it reads "Directorate of Aero-Meteorological Service".

50X1 2. [Redacted]

50X1

The Directorate of Aero-Meteorological Service prints the long-range weather forecasts on paper in the necessary quantity. These forecasts are classified Secret, and sent to Air Army Hqs by military couriers, or what the Soviets call "Sekretnaya Pochta" (Secret Post). Such mail is always addressed to the chief of the meteorological service of the various headquarters concerned. That is to say, the Air Army Hqs receives enough copies to supply each subordinate Corps, Division and Regiment. The same means of communication is followed in each case down to the Regiment level.

50X1 3.

50X1

AMS (Aero-Meteorological Station) is in the OATB (separate Air Technical Battalion) in Air Corps, in Air Army and higher. In time of war, it will also be found in the Air Divisions. Whenever an abbreviation "AMS" is written, the unit to which this AMS belongs will also be indicated.

4.

50X1

The upper air observations are made with the aid of pilot balloons, radiosondes and air observers.

5.

50X1

In the briefing of pilots of conventional aircraft, prior to flights of 30,000 feet altitude or higher, weather forecasts were always given. Pilots of jet fighters were not exposed to such a briefing as they were not called upon to fly at such altitudes at that time.
