ORIGIN
25X1X6

Preceded and accompanied by a dull noise similar to a strong rustling or exhalation of gas, three trailers red-violet in color, originating from 18° and directed toward Cherso Island, were observed less than 1,000 meters in the air. The trailers took a wavy form almost immediately but remained clearly visible for at least five minutes, assuming the form of a descending parabola in the sky. Almost at the same time three columns of water between 40 - 60 meters high were observed in the Gulf of Quarnaro about five miles from the Port of Fiume in the direction of Cherso. No explosion was heard. A few minutes later another trailer was observed accompanied by a much louder rustling sound. The parabola formed in the air was much lower and shorter. Almost immediately a column of water was observed in the sea less than a mile and a half from the Port of Fiume. The point of origin and direction taken of this trailer were identical to those of the three preceding trailers.
