EVALUATION OF CONTENT

[Redacted]

1. The former Wehrmacht Priemerwald Army Ammunition Depot near Gtstrow (T-98) is used by the Red Army. Russian and German ammunition is continually being brought to this depot as well as tractors and guns of all calibers, especially light anti-tank guns.
2. This depot has probably taken over the commitments of the former nearby Army Ordnance Depot, which was totally destroyed by bombing. Two additional shunting locomotives were recently transferred to this depot from Gtstrow. Russian ammunition is at present leaving the depot for Vienna.
