SUPPLEMENT

1. The rice harvest in Macedonia has been very successful - 4,000 quintals were gathered in during October.
2. A silo with a capacity of 3,000 wagons of grain has been built at Mostar. Work was started in 1939 but was interrupted by the war. The silo will be used for storing grain arriving by sea at Dubrovnik and for grain harvested in the Mostar area itself.
3. Great importance has been attached this year to the cultivation of broom for the manufacture of textiles on the islands of the Northern Adriatic. On the island of Rab 50,000 shrubs have been planted, while 130,000 have been planted on the island of Baksi.
4. 1,000 head of cattle have arrived from Hungary at the state farm at Belje (Osijek). This is the second consignment of cattle to arrive from Hungary at Belje. The cattle are being supplied in payment of Hungarian reparations to Yugoslavia.
