3.	a.	The Suselka copper mine is located some 65 miles to the south of Sverdlovsk. In 1947 it was producing about 400 tons of copper ore per day on a basis of
		three shifts. Each shift had a minimum requirement of 125 tons of ore. The
		ore has a copper content of 20% to 90%. The mine machinery is modern American equipment. The extracted ore is carried by light railway to the main
		line between Chelyabinsk and Sverdlovsk. Some of the cars containing the ore were observed to have been donsigned to Kaliningrad.

b.	There is an iron ore mine n	near Suse	lka			Misernerzoorf	50X1-HUM
	Magnetka) from which high tons a day by three shifts	grade ore	is	mined at	the rate	of at least 1,00	00
							50X1-HUM

c. There is a large factory near "agmetka employing at least 3,000 workers. Old Tehrmacht tank parts and scrap are melted down and Stalin tanks are manufactured at the rate of six to ten tanks per day at this plant.

(June 1945 - July 1947)

4. An iron foundry and smelting works is situated at Berezniki (59°24° N, 54°44° E). The factory consists of seven large shops and covers an area of one square mile. Four blast furnaces with a capacity of 600-700 cubic meters are in operation. Ingots weighing 2-3 tons are produced and dispatched to a nearly rolling mill. Raw materials tome from various lead, iron ore, and copper mines 8-10 miles north of Berezniki.

(December 1945 - July 1947)

- 5. On the southern outskirts of Rerdichev (49°53' N, 28°32' E) there is a tank assembly plant and an adjoining tank repair shop. Twenty tanks are reported assembled and tested daily. The repair shops are engaged mainly in dismantling armored vehicles. Tiger and Panther tanks, however, are repaired for Red Army use. Usable engines of wrecked armored vehicles are sent to a factory for agricultural machinery at Skvira. All guns, except the Cerman SSmm Ad cun Model 1941, were melted down. The assembly plant and workshops employed 1,600 workers.
- (September 1944 July 1945)

 6. At Kotlas(61015' N, 46045' E), near the confluence of the Dvina and Sukhona Rivers, there is a sloe factory which employs 1,200 workers and produces 800 pairs of shoes and 300 pairs of boots daily.

(December 1945 - July 1946)
7. A new ball bearing factory was set up after the end of the war at Sapak (sic), north of the aral Sea. The ball bearings produced there are sent to an engine factory at Kamyshbash (sic). Workers numbered 300 civilians and 300 PWs.
