50X1-HUM

The jet mortars (sic) 1948 model, currently being manufactured at the Military Technical Institute in Kragujevac, are presently assigned to all machine gun companies of the Yugoslav First Army. The penetration power of this weapon is very great, and the shells reportedly break through well-built walls up to one and one-half meters thick.

This document is hereby regraded to **CONFIDENTIAL** in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
