5X1X	1. Three houses in the Red Fill Settlement, southwest of the littstock (N54/U 11) airfield, were evacuated on 14 April 1950. Two board sheds, each with four braced radio masts, about 6 meters high, were erected in the open field near the houses.	
5X1X X1X 25X1C	of the littstock (N54/U 11) airfield, were evacuated on 14 April 1950. Two board sheds, each with four braced radio masts, about 6 meters high, were erected in the open field near the houses.  2. No aircraft were seen on the landing field OF in the open hangars on 22 April 1950. Little progress has been made at the construction site on the western edge of the field. Two motor-driven plows were being used on the sodded landing field. Another construction site apparently was east of the field. Six dumpears were seen there. The radar set previously seen was still on the plateau in the south-
