SUPPLEMENT TO REPORT NO. 25X1X

Recently, serial production of rocket mortars began at an unnamed factory located in a forest near Petrinje. These mortars, which are four-barrelled, are cast from an alloy which corresponds exactly to the alloy from which German field guns are cast. The main parts of these mortars are cast in the Misak Iron Works and the other parts in several other unspecified factories. Some parts are manufactured in the Prvomajska factory in Zagreb.
