25X1X

1. An urgent circular, dated 31 July 1950 and sent by the Cottbus regional railroad headquarters to all subordinated railroad offices, requested reports on the length and loading capacity of all available loading ramps; number and lift capacity of all loading cranes; number, length and condition of loading tracks; and the length and condition of loading roads. All changes are to be reported every four weeks. *

25X1A * **Comment.** The reports requested by this railroad order serve military purposes exclusively. The data thus obtained will show the loading capacities of the individual railroad stations and furnish the basis for necessary calculations and planning prior to large-scale transportation operations. Similar orders have probably been issued throughout the Soviet Zone of Germany although information to that effect has not been received.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
