More than five thousand well-armed guerillas are operating south of Nengtzu (103-23, 23-20), where their activities by the beginning of July had forced the withdrawal of all civil administration from the area which lies south of the Red River and west of Lanhao (103-20, 22-58). Three small forces of guerillas are also operating near the Yunnan-Kwangsi-Indochina border.
