1. In all the Ministries Soviet control has become more complete than ever. In the main Ministries and especially those of industry (Ministries of Industry, Metallurgy and Oil) the higher employees work between 14-16 hours per day. The Soviets have demanded that the delivery of materiel to the Army be accelerated.
2. Non-ferrous metals have been taken off the market completely. The Soviet counsellors have classified these materiels as "strategic materiels".
3. Party responsables have increased their home visits, as well as their demands for information, and have created all kinds of reasons to justify their appearances.
4. A new influx of Soviet officers was noticed recently in Rumania. On 5 June 1951 a meeting was held at the Tivoli theater in Bucharest on Strada Academiei. At this conference there were about 300 Soviet officers present. Six trucks of the Zis type, with 50 officers to a truck, transported these officers. These officers probably attended a political education lecture or a military conference.
