The following incident is reported as a possible indication of high-level penetration of the Austrian Socialist Youth (SJ) by the Communist Party (KPOe) and the Communist-sponsored Free Austrian Youth (FOeJ).

Sometime prior to 8 June 1951 the Austrian Communist Party distributed a secret pamphlet among the Communist factory cells announcing that a poster campaign against unemployment was scheduled to be launched by the Socialist Youth on the night of 11 June 1951. This is one of several recent instances in which the Communists have apparently been informed well in advance of the organizational plans of the Socialist Party.
