REMARKS

SOURCE 25X1X

1. [REDACTED]
Berlin, the movements of refrigerator cars, both loaded and empty, via Soviet Zone border crossing points have been tabulated. The tabulation covering the period from 16 June to 15 July 1951 indicates that a total of 789 loaded and 23 empty cars entered the Soviet Zone of Germany and 800 empty and 57 loaded cars left the Soviet Zone. Therefore, the number of incoming cars and that of outgoing cars were approximately in equilibrium. *

2. A notably large number of refrigerator cars has passed through Frankfurt/Oder since 30 May 1951. This same occurrence was observed during a three-week period in 1951 (sic) when refrigerator shuttle trains with numbers of the 8xx series hauled meat and fats from the U.S.S.R. to the Soviet Zone of Germany via Frankfurt/Oder. The duration of the 1951 program is not yet known. [REDACTED]

25X1A [REDACTED] the shipments of meat and fats from the U.S.S.R. were bound for Berlin-Zentralviehhof, Leipzig-Leutsch, Dresden-Friedrichstadt, Erfurt-East, Zwickau, Chemnitz, Halle and Weimar. It has not been determined whether these shipments have been consigned to the Soviet occupation forces or to the Soviet Zone civilian population. However, it is believed that the shipments are for both the military and civilian use as military forces can always commandeer supplies stockpiled for civilian consumption.

3. On 25 May 1951, the Soviet Zone railroad owned 592 refrigerator cars in addition to 50 refrigerator cars rented from Czechoslovakia. ** Poland rejected a request to lease refrigerator cars. These figures show that the stock of refrigerator cars in the Soviet Zone of Germany does not meet requirements. Cars of this type which have been built recently in the Soviet Zone of Germany are all for delivery to the U.S.S.R. on reparations account and under export agreements.
