SUPPLEMENT TO REPORT NO.

1. Kolocep Island is situated east of Lopud Island and west of Dubrovnik. With Lopud Island it closes the Kolocepska Vrata (Kolocep Doors); and with the Lapad Peninsula, between Dubrovnik and Gruz, and the small island of Daksa, it closes the Velika Vrata (Big Doors).
2. As is the case with Lopud Island, Kolocep Island serves chiefly as a summer resort. In the Gornje Solo (Upper Village) Section the resting home of the Federal Planning Commission is located.
3. The Kolocepska Vrata are closed by a mine field comprising three rows of mines, laid in a checkered manner at about 50 meters from each other. No passage has been left through Kolocepska Vrata.
4. The Velika Vrata had been closed by a mine field laid between Kolocep and Daksa Islands, but this field has been completely cleared and the largest ships are free to pass.
