DATE OF INFO. [REDACTED] 25X1C

SUPPLEMENT TO REPORT NO. 25X1X8

ORIGIN OF SOURCE

COLLECTOR'S PRELIMINARY GRADING OF CONTENT

1. Work has begun on the construction of a new railroad line from Kievo, near Belgrade, to Ostruznica on the Sava River. In August 1951 construction was underway near the village of Ostruznica, about 17 kilometers west of Belgrade, on a railroad bridge over the Sava River. One pillar had been placed on each side, and work on the bridge structure had begun. The construction of the railroad line and bridge is intended to relieve the traffic on two Belgrade railroad stations.
2. In August 1951 two engineering units were working in Skoplje on the construction of underground shelters. The shelters are located about 300 meters from the Vardar River under a hill over which is a French military cemetery.
