SUBJECT Anti-Tank Rocket Launcher (Bazooka)

NO. OF PAGES 1

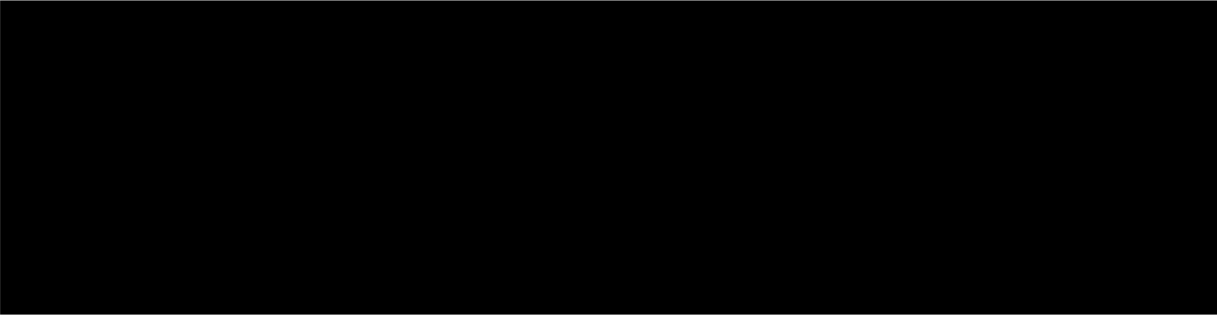

PLACE ACQUIRED [REDACTED]

NO. OF ENCLS. (LISTED BELOW)

DATE OF INFO. [REDACTED]

25X1C

SUPPLEMENT TO REPORT NO.

25X1X

1. The hand-held rocket launcher is manufactured by Military Technical Enterprise of Kragujevac. This is a new type of anti-tank arm used by infantrymen in the NEF(sic) reserve of the guards regiment. It is a combination of the American bazooka and the German panzerfaust and is commonly called "bazooka". It is probable that each infantry company of the guards regiment is provided with 12 such bazookas.
2. Specifications are as follows:

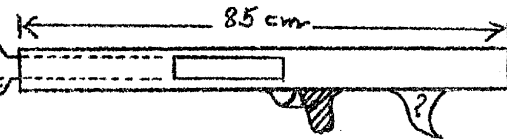

Caliber: about 50 millimeters. However, only the tail of the rocket is introduced into the barrel.

Barrel: 85 centimeters long. The trigger, handle and shoulder support are below the barrel. The rear of the barrel is uncovered.

Rockets: There are presumably three kinds of rockets. Strikes on tanks can be effective up to a distance of 150 meters.

Sight: The left side is equipped with a sniper-scope.

Document No. 009
 No Change in Class.
