COUNTRY: USSR (Estonian SSR)

SUBJECT: Oil Slate Processing Plant at Kivioli

25X1

1. Location:

The oil-slate processing plant in Kivioli (26° 57' E/59° 22' N), Estonian SSR, is directly north of the railroad line to Tallinn, on the western outskirts of town and northwest of the railroad station.

2. Plant installations:

The plant covers about 1 x 1 km. The old plant section was erected in 1898. New plant structures were added during and after the war. Immediately after the war a large number of electric motors were stolen causing a large part of the plant not to be working at the time of observation.

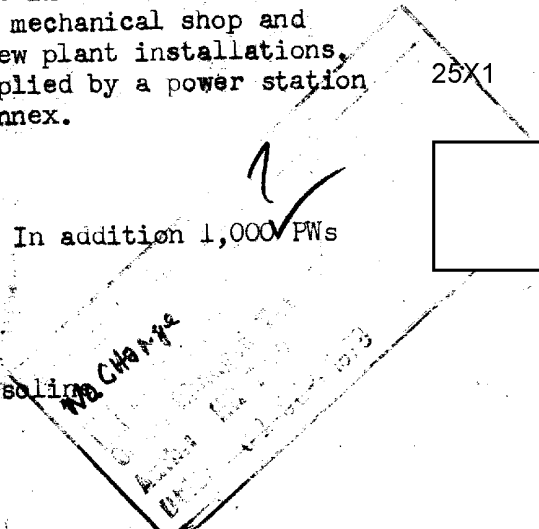

A new furnace was in operation at the end of 1948. An additional furnace was being installed by the Machine Factory of Tallinn, and was scheduled to start operation at the end of 1949. The installation of four temperature carbonizing furnaces was planned. A mechanical shop and tower, completed in 1949, were part of the new plant installations. Road connection was available. Power was supplied by a power station northeast of the plant. For plant layout see Annex.

3. Work force:

About 1,000 Estonians and Soviets, 50 percent women. In addition 1,000 PWs who worked in the plant and the slate mine.

4. Production:

Tar oil, lacquer, bitumen and small quantities of gasoline

Comment: 25X1A

The information confirms a previous report.*

ILLEGIB 1/3

CENTRAL INTELLIGENCELegend:

- 1 New structure, 55 x 13 $\frac{1}{2}$ meters
- 2 Work hall, 55 x 13 $\frac{1}{2}$ meters
 - a Supply storage
- 3 New boilerhouse, 18 x 9 meters
- 4 Annex
- 5 Smokestack, 90 meters high
- 6 Water tower, 13 $\frac{1}{2}$ meters high
- 7 Power station, 18 x 13 $\frac{1}{2}$ meters
- 8 Forge
- 9 Mechanical department, old
- 10 Mechanical department, new
- 11 Stills, one in operation, one being installed, two more planned
- 12 Conveyor installation, old
- 13 Building, old, 55 x 13 $\frac{1}{2}$ meters, purpose not known
- 14 Lacquer factory
- 15 Distillation
- 16 Oil tanks
- 17 Building, no information available
- 18 Boilerhouse, old
- 19 Stone plant
- 20 Slag stone factory
- 21 Guard
- 22 Oilstone storage
- 23 Stone dump
- 24 Cable car, leading to the slag dump (a), 105 meters high.
