Attached in the annex is a tabulation of rail fuel shipments to and from the Soviet zone of Germany during the period from 31 September to 30 November 1951.

25X1

Except for the shipments marked with an asterisk, all the shipments mentioned were reported previously. It appears that double reporting of rail shipments have been almost completely eliminated in the attached tabulation. However, it may nevertheless be possible that in individual cases shipments were reported twice in such a form as to make double reporting undiscernible. Shipments reportedly passing through Bad Schandau were crude oil shipments dispatched from Lustenfurt in Austria to Soviet zone hydrogenation plants for further processing. Since 20 November 1951, these shipments have declined to a high rate of crude oil shipments continued until 30 December 1951. \*
