THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The Chinese Communist Volunteers Army Command has constructed two groups of military warehouses at the foot of hills about 5 kilometers northeast of Unsan-ni (126-01, 39-23) (BU-4363) which is on the railroad about 8 kilometers east of Sunch'on (125-56, 39-25) (YD-5267), North Korea. The group of hills in which these warehouses have been built contains a peak named "Li Feng" (立峰). A motor road has been built from Unsan-ni to the warehouses at the foot of the hills.
2. One group of warehouses consists of 17 buildings constructed at the foot of the hills mentioned above. Each building is about 20 meters wide, 25 meters long and 15 meters high. The building is surrounded by a reinforced concrete wall one meter thick and it is covered with dirt and grass for camouflage. The top of the buildings are arch shaped. They are built about 100 meters apart. This group of warehouses is now used for the storage of general military supplies. These buildings have been constructed so that they may be used, if necessary, as defensive strongholds.
3. The other group of warehouses consists of four caves which have been dug into the hills northeast of the warehouses described above. Each one of these caves is about 100 meters wide, 150 meters long and 15 meters high. They are equipped with steel doors at the entrances. These caves have been dug about 150 meters apart and motor roads have been built leading to the entrance of each cave. These warehouses are now used for storing military weapons and munitions.
