THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

- Part of the scheduled production of Maschinenfabrik, Sangerhausen, for 1952 includes the following:
 - 130 sludge pumps
 - 120 shaft sinking winches for the mining industry
 - spare parts for cement factories (repairs)
 - machinery for the sugar beet industry
- The term "sludge pumps" is only a cover name for oil pumps. These are 2.5 meters long, 2 meters wide, and 1.6 meters in height. The air covers for the pumps have to be capable of withstanding a pressure of 220 atmospheres. One hundred of these air covers are being produced at the Frankleben steel works. They are about 85 cm. long and have a diameter of 22 cm. The boilers measure 36 m. (sic) x 2.5 m. They are made of welded sheet iron.
- The Maschinenfabrik, Sangerhausen, in its production of spare parts for cement factories, receives some 20 tons of steel castings per month from Frankleben. The parts produced are spur and toothed wheels and pinions.
- Electric power at Sangerhausen is provided on the spot by two steam engines. The current provided is insufficient and the plant has to draw on the public grid.
- About 1,200 hands are employed at present at Maschinenfabrik, Sangerhausen.
- The production of oil pumps is also in progress in Buckau-Wolf, Magdeburg, where the 1952 production totals 1,000 items, and at the Peniger Maschinenfabrik, whose production figures are not known.

25X1 1. [] Comment: It is not clear whether planned production for 1952 or actual production for the first quarter of 1952 is indicated.
