[Redacted]

1. [] following information on Kaliningrad/Yezau airfield (54-34N, 20-36E):

a. Dimensions: About 1500 meters N-S and 400 meters E-W. 25X1

b. Surface: Greasy clay soil. Rubble from destroyed buildings in Tharau, Preussisch Eylau, and Uderwangen was used to make a firm surface. []

c. Runway: Approximately 1500 meters N-S and 30 to 40 meters E-W. It was blown up by the Germans in 1945 and was under repair between 1948 and November 1950, when it was serviceable for a length of 500 meters for small aircraft only. In 1950 a small twin-engined aircraft of unknown type landed on the field.

d. Facilities: Two halls, probably hangars, each about 100 meters long and 60 meters wide, were under construction just south of the airfield. The foundations appeared to be of concrete. [] 25X1

[] In November 1950 the west hall was complete except for part of the roof and the walls of the east hall were only a few meters high. The halls were of brick.

2. The airfield is used by the Soviet Air Force.

3. [] in November 1950, work on the airfield was still in progress. The work was being done by Soviet soldiers and German civilians.

[] Comment: The measurements given are approximate, [] 25X1
