MEMORANDUM FOR: Director, [REDACTED]

SUBJECT : Remote Monitoring System

1. During the period February through May 1971 we conducted a test of the Collins Digital Remote Receiving System. The test involved an experimental mode of operations utilizing our antenna field at [REDACTED] and an operations and processing site here in Key Building. It was sufficiently successful to warrant further investment and experimentation overseas.

STATSPEC

2. Attached are copies of [REDACTED] report (Att. I) on the experiment as well as a technical report on the equipment per se from [REDACTED] (Att. II).

STATSPEC

STATSPEC

3. The system's greatest potential is in the future when satellite communications costs may permit stateside utilization of overseas antenna fields. In the interim its application will probably be limited to situations in which we are establishing a new bureau, relocating a present bureau - [REDACTED] or considering "remoting" a present bureau - [REDACTED].
