THE DIRECTOR OF CENTRAL INTELLIGENCE

WASHINGTON, D. C. 20505

Office of the Director

8/28/73

Dear Vince:

Bill Colby has approved an IC Staff recommendation to authorize remote, interactive terminal access, by the Services and intelligence agencies, to appropriate community management information maintained on CIA computers. The installation of remote terminals is, of course, subject to normal physical security requirements and funding arrangements.

Your representative to the Critical Collection Problems Committee, [redacted], had recommended that DIA have remote terminal access to the CCPC inventory of intelligence facilities and installations overseas, and to the CIRIS data base.

I would appreciate your recommendations for the implementation of this new authority. [redacted] are, as always, available to work with and assist you.

Yours truly,
