COORDINATIVE ACTIVITIES SUGGESTED FOR INCLUSION IN THE
REPORT TO THE PFIAB

25X1

1. The DCI China Activities Coordinator

2. JIIRG

The JIIRG study on exploitation of photography, which was co-chaired by a member of the NIPE staff and the Director of DIA, was completed during the past year and its recommendations have

- 2 -

been or are in the process of being implemented. The COMOR has been reorganized (and renamed COMIREX) to encompass the coordination of photographic activities including targeting, collection, processing and exploitation. Under the direction of COMIREX, considerable progress is being made in the various activities which were pinpointed in the JIIRG report.

3. Mapping, Charting and Geodesy Study

A mapping, charting and geodesy study has been undertaken to determine the intelligence inputs, including the NRP, to that program and to apportion as practicable the intelligence requirements for the end product in relation to the operational and other requirements. The study group is being chairmanned by a member of the NIPE staff with participation by CIA and DIA. This study should be completed about 1 November.

4. Intelligence Collection Against North Vietnamese POL Situation (CCPC-D-13/66, 29 July 1966)

The DOD requested as a matter of urgency that the CCPC look into the problem of intelligence collection of North Vietnam's POL situation. The CCPC submitted a report to DIA for the Secretary of Defense on the all-source capability and potential to collect intelligence against the key POL targets in North Vietnam,

including residual storage and distribution of POL supplies, and on the impact of U. S. bombing strikes against such supplies. The study also covered various actions that had been taken by collectors to enhance the intelligence coverage of this target.

5. Review of Ways to Improve Intelligence Collection
Related to NVA/Viet Cong Use of Cambodian Territory

a. In response to a request from the Joint Chiefs of Staff the CCPC made an examination of the intelligence collection capability against the NVA/Viet Cong Use of Cambodian Territory in support of North Vietnam operations against South Vietnam and submitted its findings to the USIB in a report dated 23 February 1966 (CCPC-D-6/66). A follow-up review of the development of clandestine resources reporting on this target was made to USIB (USIB-D-64. 6/36) on 18 August 1966 with the conclusion that both DOD and CIA had appreciably increased their clandestine capability against the target.

b. In June 1967 CINCPAC requested that the CCPC examine further the intelligence coverage of the use by the Viet Cong of Cambodian territory, with particular emphasis on seaborne cargoes arriving at the Port of Sihanoukville. The response forwarded to CINCPAC by DIA covered substantive views on the current state of our knowledge of the use of Cambodia in the support

~~TOP SECRET~~

of enemy forces in South Vietnam, as well as an updating of the report of clandestine coverage of Cambodia aimed at obtaining information concerning the nature and extent of that use.

6. SIGINT Targeting

A study was initiated by the CCPC in June in response to the following question which was agreed to by the Secretary of Defense and the DCI.

25X1

This study is now in the early developmental phase, the first steps dealing with a determination of the U. S. interests in the countries of the world and the development of a reporting format for collection of the information necessary to enable the final assessments to be made.

7. Intelligence Collection Against the Soviet ABM Program

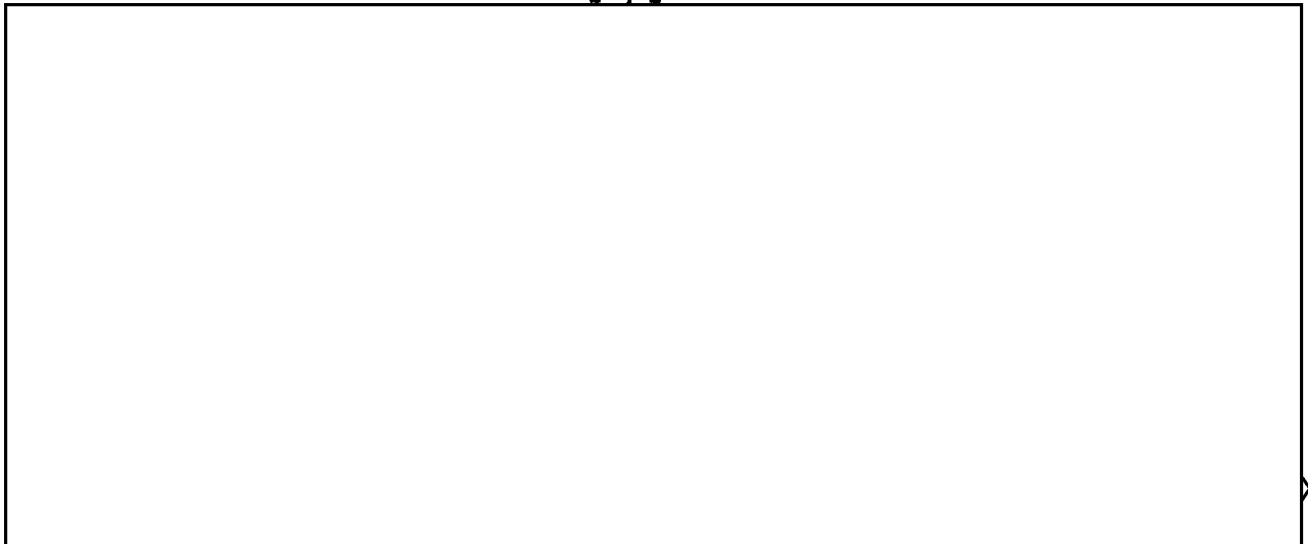

In February 1967 the CCPC updated the previous report to USIB on the various collection activities against the Soviet ABM problem, producing an extensive inventory of all such activities. This was presented to the USIB on 10 February 1967, together with
