ENGINEERING ATTACHMENT

June Monthly Report

Bangkok Bureau

A. Non-Expendable Property Received:

Microfiche Reader, Micron Corporation model 750, Serial number 25549, one each.

B. Items of Engineering Interest:

1. Work on the antenna cable relocation project at Bang Ping was halted temporarily. We await replacement of the cable stolen in April. More than half of the cable lines are now relocated overhead and a new dehydrator was installed for use on the new cables. Some signal improvement has been noticed on several of the relocated cables, indicating that the underground cables either are damaged or deteriorating.

2. One Extel AF-11R teleprinter was modified to allow "pinkie coding" for the new MIDAS format. The modification itself is simple, consisting of disconnecting one jumper and cutting one printed circuit conductor on the logic board. Finding a logic board with a character generator ROM programmed with a blank symbol may be more difficult, however. Although we found a board that had a ROM programmed with a blank symbol, it also had other character set variations.
