SUPPLEMENT TO REPORT NO. 25X1X

1. Location:

Five km southeast of the town center of Chelyabinsk (cl. 51°/55' 10"N), Chelyabinsk Oblast.

2. Plant installations:

Soviets said that the forge and the pressing shop were transferred from Moscow in 1942 and reconstructed in Chelyabinsk. The plant was in full production when source arrived in January 1949. The buildings were brick or steel structures with brick work. The were badly constructed and appeared neglected. Power was supplied by the power plant about 2 km to the northwest. A railroad connection was available. The road leading to the plant was in poor condition. The plant covers about 300 x 400 meters. For plant layout see Annex 1.

3. Work force:

Five thousand civilian laborers and 200 PMS working in three shifts.

4. Production:

Woodgas generators, frames for trucks, crank shafts, rims for trucks and buses, spring leaves for trucks, fenders, engine hoods, sheet-metal layers for runways. All motor vehicle parts were shipped to Kias.

Attachments: 2 sketches of motor vehicle parts plant in Chelyabinsk.
