SUBJECT: Comment on International Geological Conference at Algiers

25X1X6

25X1X6

1. All geologic maps [redacted] at the conference are available at the Library of Congress and the US Geological Survey, Washington.
2. Soviet papers at the Congress gave evidence of good scientific work. The Soviet delegates obviously attended the Congress in order to use it as a listening post; they were carefully watched by one another. They were obstructionists at all procedural discussions and held up orderly procedure considerably in an attempt to have Russian adopted as an official language of the Conference.
