Subject: Steel Production Form/Raw Material Flow Sheets

Place Acquired: ---- 25X1A

Date Acquired:

Date of Information: About 1948 and 1946

25X1X6

Source: DOCUMENTARY

F A-42563

1. We are forwarding two copies of Forms AISI,300 to 309 inclusive.
2. One photostat of diagrammatic flow charts of:
 - a. Class "A" Main Belt Armor for battleships.
 - b. 3½" Round High Explosive Shell
 - c. Ship Plates
 - d. Aircraft Alloy Steel Bars
 - e. Bullet Core Steel

These charts are only considered 90% accurate as a present-day practice.

At the same time these flow sheets of Raw Materials were prepared for General Donovan of OSS, fifteen beautiful 6 x 8 ft. maps of the world were prepared showing sources of the raw materials. When AISI later tried to get these maps to photograph them, OSS stated that they were lost. [redacted] stated that there "was as much chance of losing them as losing a hog's head in a subway car." He thought they would be of great use to you.
