MEMORANDUM FOR: Director of Finance  
Director of Logistics  
SUBJECT : Decentralization of Office of Security  
Property Account  
REFERENCES : [REDACTED]

25X1A

1. In a recent audit of the Office of Security's financial and logistical records, the Audit Staff noted that this Office has one Type II Property Account of \$5,945,000 covering [REDACTED] Headquarters MR Property Accounts. It was found that having a single account of this size covering locations far removed from Headquarters caused problems and duplication of effort and records. [REDACTED] maintains its own property files and records in addition to those maintained in the Headquarters OS Logistics Branch. [REDACTED]

2. In response to a recommendation in a previous Audit Report, the Office of Security's Technical Security Division has been trying for the past year to establish property records, restrict access and control property removal. This has been hampered by having several technicians working on the property account at different intervals and in not having one individual responsible for maintaining their records. This MR account of over 600 line items of accountable property has a value in excess of \$4,000,000. The Audit Staff recommended that a separate account be established for the Technical Security Division's technical property, an individual be assigned to control the property, an inventory be taken, and all property not under control of the Technical Security Division be transferred to the appropriate account.

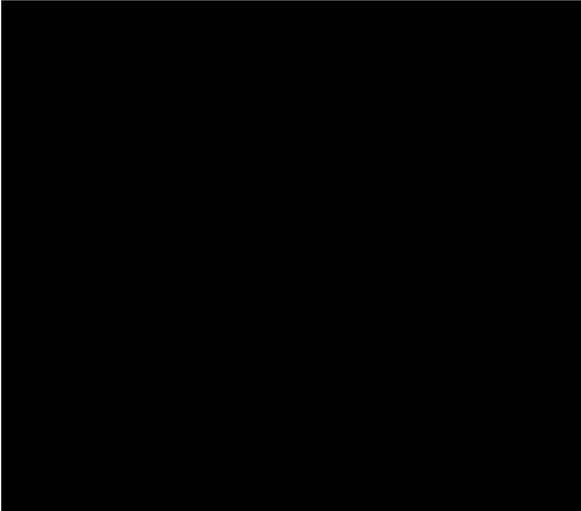

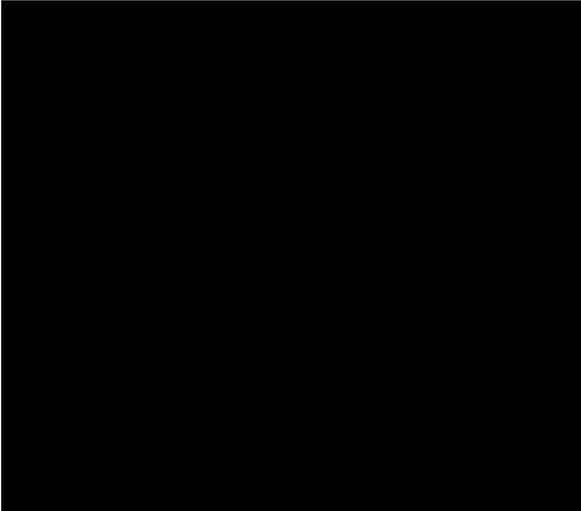

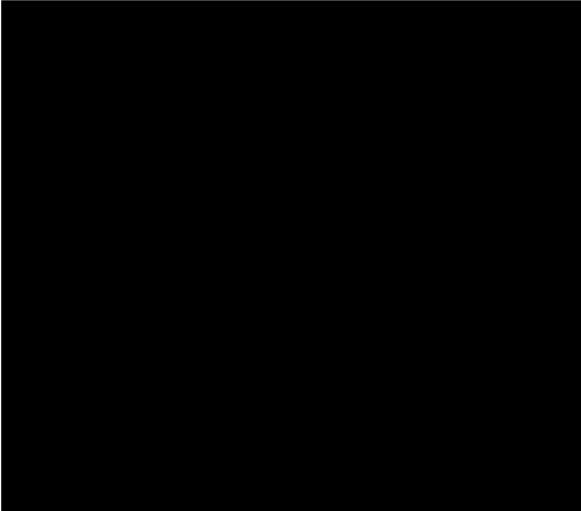

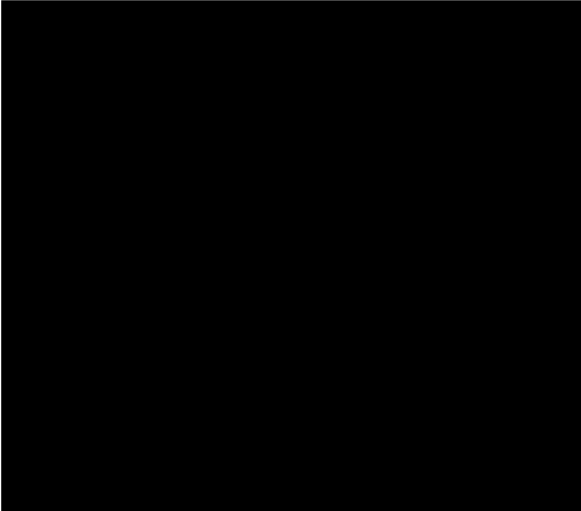

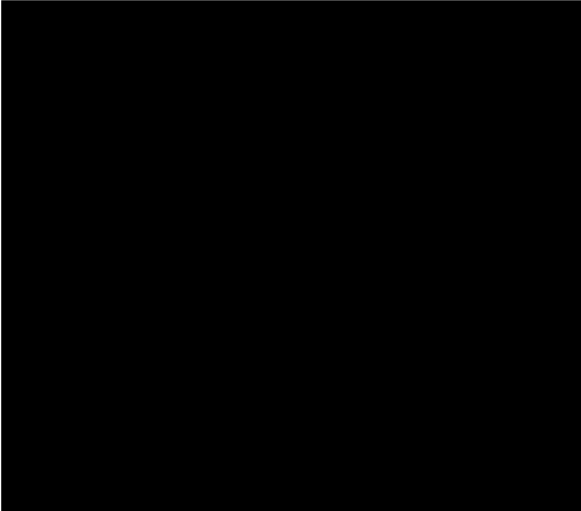

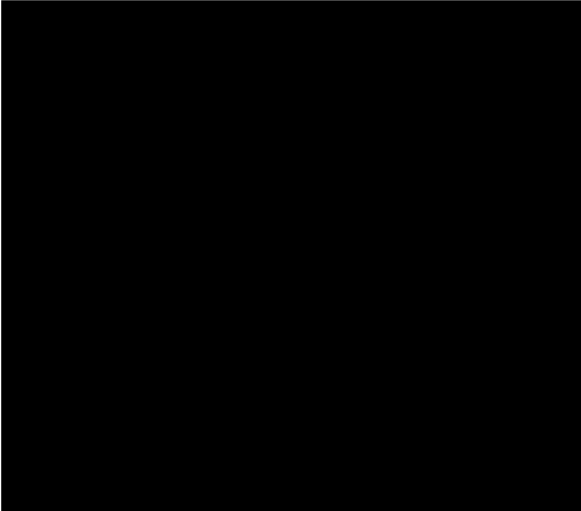

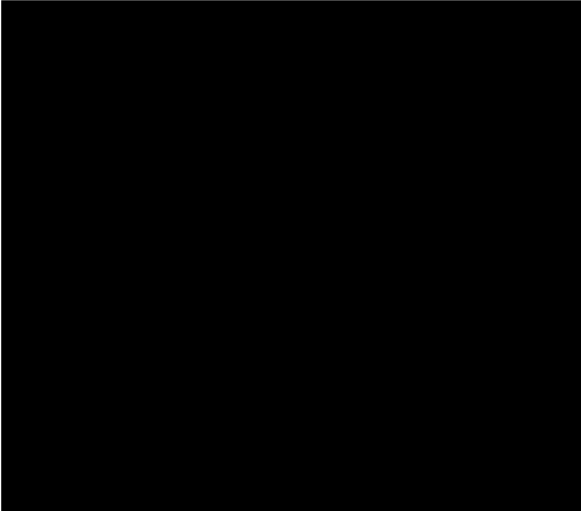

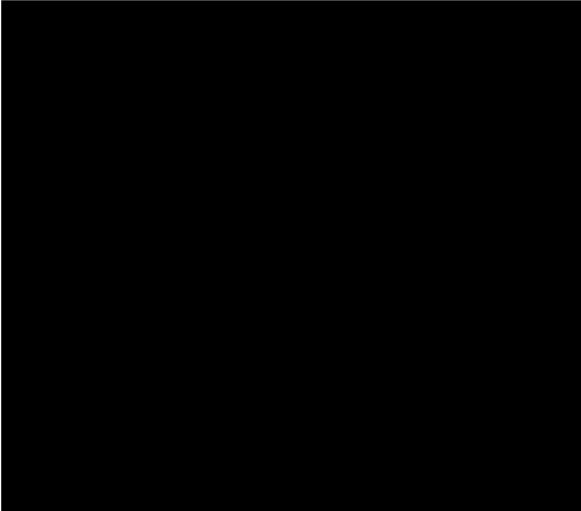

3. The Office of Security concurs with the above two recommendations, and the Office of Logistics has identified an officer for assignment to the Technical Security Division. It is requested, therefore, that you concur in the establishment of the following property accounts:
