MEMORANDUM FOR: CIA Member, USIB

SUBJECT : Comments on Review of National Intelligence
Vol. 1, No. 2

1. This memorandum provides comments on the second issue dated June 1975 of the Review of National Intelligence (RONI), prepared by the Product Review Division of the Intelligence Community Staff. This publication will be scheduled for USIB discussion at an early date.

2. This issue is an improvement over its forerunner. There appears to be more balance in the substantive presentations. It is encouraging to note that PRD has received comments and letters regarding past articles and has taken the trouble to point out differences of opinion among analysts. However, more work needs to be done to solicit consumers' views on the quality of the intelligence product.

3. On balance this publication provides a useful vehicle to critique the intelligence coverage in certain publications and should be continued. Now that RONI is established there would appear to be little need for USIB discussion each time an issue hits the streets.

Thought you would like to get a copy
of this in your capacity as DCI's Special
Assistant. Perhaps Jim H. would like to
see it too. (General Graham, as USIB
member, is receiving 10 copies to dissem
as he sees fit.)
