28 June 1982

MEMORANDUM FOR: Deputy Director for Intelligence
FROM: Director of Central Intelligence
SUBJECT: Western Sources of European Gas

In doing a follow-up on the assessment of Western sources of European gas dealing with the additional points which Secretary Carlucci and Secretary Olmer have raised, include an assessment of the availability of Iranian gas. Iran has more gas than anybody else except the Soviet Union. There is a project being developed by pipeline through Turkey across the Aegean into Italy. The economics of this project are said to be better than the Siberian or Norwegian gas.
