MEMORANDUM FOR: National Intelligence Officer for Economics

FROM:

Director of Central Intelligence

SUBJECT:

CSIS Contingency Report, "Vulnerabilities of the

International Financial System"

Although this paper sort of falls off at the end it presents a very interesting picture in a way which I don't think I've seen before. I would like your evaluation of how it compares with our paper on the financial crisis and what additional insights this provides a reader.

William J. Casey
