**SECRET****SECURITY INFORMATION****CHAPTER IV****HISTORY OF FOREIGN DOCUMENTS DIVISION****1946 - 1952****Section A**  
**Pre-CIG**

Foreign Documents Division is the development under CIA of operations initiated in five war-born organizations of the Departments of War and Navy. The five organizations involved were the Pacific Military Intelligence Research Section (PACMIRS), Op-32F141 Section of ONI, Washington Document Center (WDC), German Military Document Section (GMDS), and Special Document Section of G-2 (SDS).

PACMIRS  
MIS Proj  
No 2516

PACMIRS was established at Camp Ritchie, Maryland, under MIS, G-2, WDGS, on 6 September 1944.

OP-32F141 was established by the Office of Naval Intelligence as the naval counterpart of PACMIRS in Washington, D.C.

Rep of Jap  
Doc Conf  
28 Dec 44  
15 Jan 45  
War Dept

Washington Document Center, established February 1945, was the joint Army-Navy clearing house for captured Japanese documents received from the Far Eastern theaters.

PACMIRS mission was the strategic-level exploitation of the Japanese material pointed mainly to Army and Air interest. OP-32F141 similarly exploited for primarily naval interests.

PACMIRS was manned by US Army officers and enlisted men, including Nisei personnel, recently graduated from the Army's Japanese-language schools or returned from interpreter and translation service overseas; with Navy personnel in the Air Section, and with details of British and Canadian military personnel. WDC also was supported by Army and Navy personnel for the receiving and screening processes.

**SECRET**

**SECRET**  
SECURITY INFORMATION

OP-32F141 was staffed primarily by US Navy officers who were graduates of the Navy's Japanese-Language and officers of the British and Canadian Navies.

War Dept  
Orders

Memo for  
AD/O from  
JJB  
17/1/47

At the close of the war with Japan, Army and Navy jointly established the Washington Document Center (Advance) echelon in Tokyo and in six months this unit collected, selected and evacuated 650,000 captured document items to Washington, D.C.

War Dept  
Orders

During these six months, embracing the turn of the year 1945-1946, the entire Japanese document exploitation venture was in the process of merger as a joint Army-Navy operation and on 17 April 1946, PACMIRS, OP-32F141 and WDC combined in one location, assuming the existing name of Washington Document Center for the whole. This was the actual inception of what is today FDD.

See  
Sec. B

WDC continued as a military operation for little more than seven months, the latter of which were involved in prospective transfer into the relatively new Central Intelligence Group. The Army and Navy, increasingly precarious as sponsors because of post-war budget cuts, were planning the abandonment, or at best the drastic de-emphasizing, of the operation.

Recollection

During the war, German Military Documents Section had operated under the War Department at Fort Hunt, south of Alexandria, and shortly after the war, the Special Document Section, also under the War Department, had been set up at Holabird Signal Depot, near Baltimore to exploit captured German documents for information on the USSR.

See  
Sec. C

While not involved in the initial adoption of WDC by CIG on 1 December 1946, GMDS and SDS were later to meld their operations in document exploitation under the Document Center in CIG.

Section B  
Transfer to CIG

Negotiations involving Army, Navy and CIG had been initiated during the late summer of 1946 relative to centralizing the document exploitation effort under Central Intelligence Group control.

Ch, IG, WDGS  
to DI, WDGS  
5/9/46  
Pol file

In a memorandum concerned with the results of a conference on disposition of captured documents, Col. R.F. Ennis, Chief, Intelligence Group, WDGS, on 5 September 1946 noted an Army-Navy agreement pending approval which closed with the intention "to seek centralization of German and Japanese documents in CIG."

DI, WDGS to  
DCI 3/10/46  
T/O  
Pol file

Maj. Gen. S.J. Chamberlin, DI, WDGS, on 3 October, addressed the DCU in a memorandum to the effect "in realization that continuation of the Washington Document Center is highly desirable" the ID and ONI had jointly proposed that CIG take over the "functions and activities" of WDC. To assure the temporary continuation he stated that the present military strength would be retained until 1 December and that transfer to CIG of War Department civilian personnel employed at WDC had been approved by the War Department. He offered cooperation in any meeting called on matters of transfer.

Ch, ID to  
DCI 8/10/46  
T/O  
Pol file

This meeting, or at least one such meeting, was held five days later, a report by Colonel Ennis referring to a conference with [ ] of CIG on 8 October, in which 12 officers and 20 enlisted personnel were authorized for WDC assignment for the period 1 December 1946 to 1 July 1947. This was a reduction of the T/O of the Army people on duty with WDC from 29 officers and 82 enlisted personnel, "in view of arrangements with ONI that ONI assume

25X11A

**SECRET**

**SECRET**  
SECURITY INFORMATION

responsibility for WDC and that ID assume responsibility for the German Document collection."

Perry to  
Ex P & A  
11/10/46  
T/O file

It was this meeting which resulted in a visit by Colonels Perry and Haynes of ORE to WDC on 10 October for a conference with Commander Mark T. Little and Major William B. Pohlman, the respective military chiefs of WDC, as referred to in an 11 October memorandum of Colonel Perry to the CIG Executive for Personnel and Administration. In this it was recommended that provision be made in CIG for the WDC Table of Organization, totaling 151, for the period 1 December 1946 to 1 July 1947. This T/O was to include 98 Army personnel, including 28 civilians, and 53 Navy people, including of which would be 36 civilians/ 28/officers converting to civilian status.

This memorandum also stated that immediate steps should be taken for security checks of the personnel available in WDC.

T/O file  
Admin  
11/10/46

At the same time, Commander Little provided a tentative T/O for continuing the operation under CIG, beginning 1 December. This organization totaled 156. (Tentative T/O Chart, 1 December 1946 -- Section G) It might be noted that this T/O was drawn with the military strongly in mind and recommended that military officers were more desirable in some positions.

Transfer of the military operation to the civilian organization required not only the concurrence of the military but also that the transfer be requested.

Mission &  
Functions  
27/11/46

executive to the Director of Central Intelligence on 27 November, writing to the Secretary of the Navy in reply to the latter's memorandum of 26 November, stated that "in pursuance of the request received from General Chamberlin (then AC of S, G-2) and

**SECRET**  
- 4 -

**SECRET****SECURITY INFORMATION**

Admiral Inglis (DMI) the Central Intelligence Group would take over operation of the Washington Document Center on 1 December 1946.

The transfer of WDC to CIG was marked by a physical move of the organization from the Steuart Building to 1340 L Street, N.W. This was completed the night of 30 November 1946 in coordination with the units of the Federal Housing Administration with whom WDC was exchanging space. WDC occupied the fourth, fifth and sixth floors of the L Street Building, strict security measures accompanied the move of the organization equipment, and documents, with commissioned Army and Navy personnel acting as guards.

T/O file  
Admin  
4/12/46

The personnel estimate of Commander Little was not fulfilled as of December, for a tentative T/O filed on 4 December with Colonel Perry by Major Pohlman revealed that there were 53 vacancies to be filled against the 151 total, only 98 Army, Navy and civilian personnel being noted as available against scheduled positions of that date. This T/O varied slightly from the 11 October submittal.

ibid  
16/12/46

The Pohlman memorandum was forwarded by Col. L.T. Shannon, Advisor for Management, to the Assistant Director for Operations for his recommendations for action, noting that "since it is a going concern it cannot be given first priority in the development of its final organizational structure and personnel requirements" but providing that emergency needs, such as hiring as civilians the military personnel leaving the service, could be taken care of temporarily "pending later establishment of an approved organization."

A Ex D to  
AD/O  
16/12/46

WDC had operated with some of PACMIRS British and Canadian personnel on its roster. This was not permissible under CIG, and on 16 December 1946, the Assistant Executive

**SECRET**

**SECRET**  
**SECURITY INFORMATION**

Director instructed the AD/O that no Allied Force personnel might be assigned to WDC. This finally deprived WDC of language personnel available among allied personnel assignees. Operations of any Allied liaison officers and their assistants were to be governed by Chief, WDC and the AD/O.

**Mission &  
Functions  
17/12/46**

In a presentation of the WDC mission and functions, dated 17 December, [ ] Acting Chief, WDC, submitted to the AD/O another T/O involving change of nomenclature for some positions and offices and calling for a total of 161 persons. Against this he proposed that recruitment be initiated to bring the current 90 assigned and on duty to strength of 142. (See chart Section G)

25X1

This was the T/O which carried WDC into 1947, with 92 persons on duty, more than half of whom were Army and Navy personnel.

**Signatures**

**Recollection**

**Bull No 152  
20/12/46**

On 26 December, WDC was operating under the Office of Operations and [ ] was Acting Chief, (in the prolonged absence of Commander [ ]). On 30 December 1946, Washington Document Center became another "historic" name, but its operation continued and expanded under a new designation "Documents Branch" of OO/CIG.

25X1

WDC at that time was operating under a mission, described by [ ], as "a basically factual research organization on the Far East, to provide CIG with current and background intelligence data on the Far East as found available in oriental language publications."

**Atchd**

**memo,  
mission &  
functions  
17/12/46**

However, a rewrite of the mission and functions to apply to the new Documents Branch designated it "an organization for the exploitation of foreign documents."

**SECRET**

**SECRET**  
**SECURITY INFORMATION**

It's mission -- to provide the CIG with current intelligence information on foreign countries as found available in foreign language publications."

The functions at that time: to receive foreign documents for cataloguing, summarizing, and translation (documents to be received to be determined by AD/O and AD/CD); to prepare subject lists of accessions for distribution; to prepare extracts and summaries to meet requirements; to provide technical liaison with similar activities; to establish exploitation projects on a continuing basis as required; to dispose of documents not needed in accordance with policies of AD/O and AD/RE.

Though WDC had been operating under the Office of Operations, the Office of Reports and Estimates had originally been charged with this responsibility.

V Memo, Col Wm  
H. Harris  
Ex for P&A  
31/12/46

On 31 December 1946, DB was retroactively assigned to OO as of 1 December 1946 and formally designated Documents Branch of that Office and the mission and functions outlined above were stated in a memorandum from the Executive for Personnel and Administration to all offices of the Group.

Notice  
2/1/47  
Civ Pers  
File

A notice to employees of DB on 2 January 1947 constituted its formal welcome to CIG by the DCI, Lt. Gen. Hoyt S. Vandenberg. The notice praised the high quality of DB work and referred to its importance in the intelligence effort.

The transitional period of WDC-DB from War-Navy to CIG was marked by every characteristic of change. Particularly of note were those problems relating to personnel, new sources of service and supply, new areas and channels for liaison, new administrative procedures.

**SECRET**

**SECRET**  
**SECURITY INFORMATION**

DAD/GO to  
Except for  
P&A Ch, Sec  
Div, 8 Jan 47  
Pol File

Of special personnel interest was CIG's exclusive security clearance requirements. Most military personnel of WDC had been cleared for intelligence work of high security classification to the satisfaction of War and Navy Departments' wartime standards. CIG's stricter requirements were quickly reflected when "waivers" were sought in vain for certain personnel not meeting citizenship or other requirements. [REDACTED] Chief, Security Division, noted on 8 January 1947, that "there is a possibility that an exception might be made in the case of the Documents Branch" but such was not advisable because of difficulty in discharging an undesirable individual once hired.

25X1

AD/CD to AD/O  
10/1/47  
Pol File

Operationally the turn of the year began to resolve some of the problems of DB integration with CIG. A study on requirements, and control of dissemination of DB material had been made by O/CD.

[REDACTED] AD/CD, reported that DB had been authorized to arrange for its consumer agencies to submit requests through OCD.

[REDACTED] recommended that the 2,000 item backlog of DB be returned to requesters for reconsideration and resubmittal, that publication of Accession Lists be continued, and that reference material be eventually turned over to Reference Branch, ORE. The approval for sending nonintelligence Japanese documents to the Library of Congress was continued, and classification of material and other details were covered in this report.

AD/CD to AD/O  
17/1/47  
T/O file

AC/DB to  
AD/O  
17/1/47

The AD/CD also referred to personnel shortages limiting the service of DB and in his subsequent memorandum a week later recommended that recruitment be undertaken to fill the DB T/O of 161 to effect efficient operation and dissolution of the backlog of work. [REDACTED] in his

25X1

**SECRET****SECURITY INFORMATION**

recommendations relative to future requirements to be expected for DB, referred to the 120,000, of 650,000 Japanese documents, which had not been processed, a backlog of 350 Accession Lists, and current receipts of 10,000 captured documents and current periodicals per month.

He tabulated the projects in process against personnel on duty and the number required, and recommended recruitment of 71 persons to fill the T/O. He proposed that, after three months, a survey be made to determine future requirements effecting DB. (Details, see Section E)

[redacted] pointed out that the current Research Projects of the branch embraced the USSR; North Korea, Mongolia and Manchuria; China; Japan and Southeast Asia, and Scientific, designated respectively Projects A, B, C, D and E.

Survey (no  
date) Civ  
Pers - Gen  
Admin file

Complicating the personnel problem of this transition period was prospective conversion to civilian positions of the military men and women on duty with the Branch. An early January survey revealed that numerous civilian personnel planned to leave the branch employment relatively soon to continue education, assume overseas positions, travel, or for personal reasons, and that 17 of the military personnel would accept civilian jobs with DB, a number being undecided.

Mil Pers  
Allotments  
9/1/47  
T/O file

The use of military personnel, however, was resolved on 9 January when [redacted] Executive for Personnel and Administration, published a memorandum on the percentage allocation of Army personnel to CIG. In this the War Department called for a graduated "phasing out" of most military personnel before 1 October 1947.

This required almost immediate action to reduce the already

Since its integration into CIG, DB had continued its research projects, preparation of material for the Industrial Card File and publication of accession lists of captured Japanese documents.

AD/O to  
Chief, ICAPS  
2 Apr 47

Meanwhile the problem of exploiting current foreign periodicals and press was being explored, and in 2 April the publication of Periodical Abstracts culled from Japanese current publications was started. (See Section E)

Ex Dir to  
State, Army,  
Navy, Air  
19/5/47  
Pol file

With assimilation of SDS and GMDS, FDB took over the huge project of the Industrial Card File and other projects from SDS, and the screening and cataloguing of military documents from GMDS.

The reorganization, approved as of 10 June allowed a T/O of 250, but proposed transfer of personnel from SDS and GMDS met with poor success because of CIG security requirements. The increased demands for reproduction and publication constituted a large problem, and the Branch was facing the increasing difficulties of recruiting and clearing against the ordered decrease of military personnel.

[redacted] was named Chief of FDB on 24 October 1947, and held the post for one year; since then the activity has been under the direction of [redacted]

25X1

- E N D Section B -

**SECRET**

**SECRET****SECURITY INFORMATION**Section C  
Growth and Development

The tentative T/Os for the early development of FDB (See Sections B and G) anticipated continuation of the operation. However, against every such table were the personnel "ceilings" imposed through Personnel and Management and designed to hold the numerical employment within bounds of the organization's requirements.

Ex, P&A to  
Ch, DB  
6/2/47

Such ceilings were announced for quarterly periods, the first noted for DB being on 6 February 1947 when the ceiling was given as 84 for the quarter ending 30 March 1947. The ceilings for five periods following, ending 30 June 1948, were stated tentatively as 125 inclusive of military personnel.

DEX P&A to  
Ch, DB  
19/6/47

On 19 June another adjustment was announced, raising the ceiling to 170 for the September quarter, and raising it to 190 for the three periods following to 30 June 1948.

AE&D to  
ExP&A  
10/6/47

This increase resulted from the approval of the reorganization and a new T/O for FDB in June 1947. This T/O called for 250 and stood until revision in December so as to include a Translation Service Division.

ADO to  
EX&A  
21/11/47

Establishment of a central translation service in FDB for CIA was authorized in Administrative Instruction 50-14. Tentative T/O for the Translation Service Division was submitted 21 November and called for 67 linguists, 10 typists and three supervisory personnel for the new division, and two editors and four typists in the Branch Editorial Section to handle the additional publication load anticipated.

EX&A to  
ADO  
26/12/47

This was subjected to revision before final approval of a new tentative T/O for FDB on 26 December 1947.

**SECRET**

**SECRET**  
SECURITY INFORMATION

T/O  
22/12/47

This T/O provided for 44 persons in the Translation Service Division, of which 37 were linguists, and allowed one more editor and two additional typists and a laborer for the branch as a whole. The FDB T/O (See Section G) allowed for 265 total personnel. Initially it had totaled 268, but three mimeograph operators were cancelled because of the transfer of this function out of the branch. The personnel ceilings set against this were 210 for the quarter ending 31 March 1948, and 240 for the quarter ending 30 June.

June 1948 saw FDB operating its lone field unit -- the "Sunshine" Project at Hoover Library on War and Revolution, Stanford University, Palo Alto, Calif. This project was taken over from ORG on 4 May 1948 after the latter had fostered it for a year (See Section D). This added six slots in the "field" category of FDB's T/O with a corresponding ceiling.

EXAM to  
ADO  
3/6/48

ADO to  
ChFDD

ref  
EXAM  
22/6/48

The Executive for A&M noted on 3 June 1948, however, that the "Branch departmental table of organization 268 [7] positions, and the personnel ceiling of 240 positions remains unchanged." On 25 June, FDB was informed that the ceiling was again revised for the first quarter FY 1948: departmental 175, field 6, for a total of 181.

EXAM to  
ADO  
19/7/48

The T/O was amended on 19 July to include an additional Administrative Officer, thus increasing the total T/O to 269 [7] with the quarterly ceiling, 175 and 6, unchanged.

The organization approved 29 July 1948 involved still further reorganization in response to demands for wider and more comprehensive coverage of sensitive areas. (See Section G)

**SECRET**

**SECRET****SECURITY INFORMATION**

The former Library Section was absorbed in a new Documents Screening and Reference Division. The satellite coverage was assigned to a new Eastern European Division, segregated from the USSR Division. Branch coverage was expanded with creation of the Near East/Africa Division.

EXAM to  
ADO  
29/7/48

EXAM to  
ADO  
22/9/48

The T/O was decreased with this reorganization, departmental allowance being set at 240 with six for the field office. The personnel ceiling for the first quarter of FY 1949 was authorized at 206, including the field personnel. Ceilings for the remainder of the fiscal year were set at 206, 225, and 246.

Regardless of T/O "slots", regardless of ceilings, FDB's recruitment continued far short of meeting the allowances.

Admin  
records

Only 92 were available against the original WDC/CIG T/O of 161. The reorganization of June 1947, assimilating 22 of the SDS-GMDS personnel, brought the roster to only 102, numbers having been lost through Army-Navy service transfers and separations.

With the July 1948 reorganization the total on duty numbered only 141 of which four were in California.

The requirements for language proficiency, the necessity for security clearance, the time lapse for such clearance encouraging applicants to take other jobs, the increasing scarcity of clerical personnel -- all conspired against filling the FDB vacancies.

As of 1 January 1949, the roster carried only 138 personnel, and as of 1 June 1949, only 158.

ACHFDB to  
ADO  
27/6/49

As reviewed that month by Acting Chief   "many obstacles to recruitment have appeared during the past eighteen months ... exacting standards of excellence ... since January 1948..." estimated 650 applicants screened si

25X11A

**SECRET**

~~SECRET~~~~SECURITY INFORMATION~~

However, the memorandum revealed that a stable and continuing increase in acceptable candidates was evident and that more had been employed in three months than during the previous year. [ ] also pointed out that the rate of loss was very low.

25X11A

According to this memo regarding the prospective T/O for FY 1950, the total on duty or blocking positions while awaiting clearances was 220. A cut of 40 positions had been suggested. He declared that this would stop recruitment at a time when it was becoming most successful and when requirements for FDB services were steadily increasing.

He proposed that the current T/O and ceiling of 240 be allowed to stand for 1950.

T/O  
4/8/49

ADO to  
Ex CIA  
undated

T/O  
Phstat  
24/8/49

However, the personnel cuts were effected and in the face of these losses, FDB successfully proposed reorganization for the most efficient use of the 200 allowed. This reorganization involved readjustments and reassignments among the area branch personnel; redesignated Documents Source Survey Division as Documents Control Division with two sections -- Survey, and Reference and Screening; removed the former Records and Editorial sections from Administration and combined them under a new Reports Division composed of three sections -- Editorial, Records, and Composition and Layout. (See Section G) The Translation Service Division was dissolved in favor of carrying out its functions in the area branches. The personnel ceiling was also set at 200 in the approval of this T/O on 24 August.

While this reorganization was being shaped, the branch had also been involved in a physical upheaval -- movement of the entire operation from the L and 14th Street, NW, building to three second floor wings of Temporary Office Building Y at Constitution Avenue and 21st Street, NE.

~~SECRET~~

**SECRET****SECURITY INFORMATION**

Proposed for 1 July, when the L Street building was subject to transfer, the move was finally completed by PBA auspices late in July. The operations of the branch were not greatly hampered, relocation and operations being totally completed before 1 August.

T/O  
3/1  
2/4  
19/6  
21/12/50

With the reorganization in prospect at the time of the move, plans for allocation of space had been made with this in mind. Upon approval of the T/O in late August, little confusion resulted and the organization was thus established in the form which was to stand substantially unchanged for two years. Only internal readjustments were required for the changes approved respectively 3 January, 2 March, 19 June, and 21 December 1950, the total personnel allowance remaining at 200.

Admin  
Morepa

Against this allowance the recruitment slowly edged the roster figure upward: 177 December 1949; 179 June 1950; 182 August 1950; 186 December 1950.

Dep Ch, FDB  
to Ch  
Budg & Fin  
6/2/48

From the time FDB had launched into the partial exploitation of foreign press, additional demands upon its rather sparse personnel failed to keep pace with the added requirements against its mission and functions. Early in 1948 an "overtime program" was initiated in the attempt to reduce a backlog of translations and later to provide for greater press and periodical exploitation and meet the demands for translation service. This program was continued, with but one short interruption and still the backlog continued to accumulate.

At the start, approvals of Budget and Finance were required to authorize the needed overtime allowances for the branch, but with the start of the Korean action in June 1950 and the beginning of a period of six-day work weeks, overtime became more under standard order.

**SECRET**

**SECRET****SECURITY INFORMATION**

However, as 1950 drew to a close, the demands for translation service by the several CIA offices were obviously greater than the Documents Branch personnel could meet under the existing table of organization. A new proposal was drafted, with the concurrence of OER, OPC, OSO and OSI, for the expansion of FDD for more efficient processing of the translation requirements.

Project  
Action  
OO-68-51  
6/1/51

With an estimated 70,000 pages of required translation in prospect as a backlog against the estimated requirements, FDD needed 70 additional linguists and 10 typists. This was proposed successfully, with the additional costs to be charged to the budget of the customer offices. Final approval was signed 6 January 1951.

Project  
Action  
OO-67-51  
6/1/51

At the same time it was estimated that the same interested offices of CIA would require 37,000 pages of unclassified material translated for the year. This led to the approval of a separate project under FDD for the commercial contracting for processing of this material at the rate of \$4.40 per page. To service this material in and out of the division, two other positions were approved.

T/O  
25/2/51

The addition of 82 to the T/O did not change the physical organization of the division, the new assignments being disposed of in adjustment against the requirements of the various branches. This reassignment of slots was approved in the T/O of 25 February 1951.

In anticipation against these approvals, recruitment had already been initiated for expansion of personnel. The year had started with 183 persons employed by the division. February saw the roll increased to 190, March 203. The division had been forced to contract in August 1950 when

**SECRET**

**SECRET****SECURITY INFORMATION**

another unit of CIA required space in the building, and the increase in personnel required still more physical readjustment.

Requisition  
5 May 1951

However, in May preparations were made to take over a fourth wing of the second floor of  to accommodate the swelling organization. This expansion accomplished, the division was physically set up for most efficient operation before the summer months.

T/O  
14/6/51

Comptroller to AD/O  
11/6/51

The revised T/O was approved as of 14 June, no increase in personnel provided.

While additional translators, routine overtime, and the contract service was helping materially to keep FDD abreast of the demand, certain special types of translation requirements necessitated specially expert and expeditious treatment. To effect this, an ex-officio Special Language Section was organized under expert multilingual specialists late in June 1951. While effecting no organizational change, this section was designed to draw upon the entire divisional potential as required and has tended to expedite much arduous translation work.

The June T/O was <sup>to</sup> carry the division into 1952, and the end of the year saw the division for the first time approaching recruitment marks nearing the full T/O allowance. As of 31 December there were 231 on duty against 282 total personnel allowed.

Sources, Coverage and Production

With integration into CIG 1 December 1946, WDC was operating with the bulk of 650,000 captured Japanese documents as its main source material.

A small number of documents had been received from State, War and Navy department channels, and about 10,000 documents per month were being received from G-2, SCAP's current collection.

ACE, DB to  
ADO  
17/1/47  
Status

DB at that time was screening these for a: their intelligence value; b: storage as of possible future value; and c: interest of American industry through the Department of Commerce. Documents of no intelligence value or industrial interest were to be turned over to the Library of Congress.

Documents Branch was preparing an average of 2,500 abstracts weekly as a result of this screening, and exploitation was proceeding from a review of these abstracts against the requests produced by the agencies receiving the abstracts. Summaries were prepared for more complete information on pertinent material. Translation, in whole or part, was carried out to meet requirements. In December 1946, about 50 translations were in process in the branch, and fourteen documentary research projects were under way. There were 350 Accession Lists in process, 10 Translations and 1 Research Report awaiting publication, with the branch reproduction capabilities limited to about 10 publications per week.

The document backlog consisted of 145,000 documents to be processed.

The organization had a potential of 31 different languages, and while Japanese was the principal medium of exploitation at the time, the anticipated future for DB was that all major languages of the world would be exploited.

**SECRET**

SECRET

Nonparticipating government agencies and nongovernmental institutions acquainted with the acquisitions in the occupied countries were clamoring for a share in the documents. Agreements with the Allied Forces which had cooperated in the collection effort had to be reconciled with the requirements of the US.

DI,WDGS  
to DCI  
13/2/47  
Pol file

In reply to a British question, the DI, WDGS on 13 February 1947 responded to the DCI (concerning ownership of the documents which CIG had taken over from the War and Navy departments), to the effect that there was no record to deny that sole title to the Japanese documents was the United States. He cited an informal working agreement with the British in which release of such material did not require British concurrence.

AmLibAssn

Sec Navy  
17/2/47  
[redacted]  
to  
ADO  
3/3/47

Communicating through the Secretary of the Navy, the American Library Association, in February, voiced its fear that the documents in WDC would not be preserved as a unit and that documents of such value should not be allowed to become lost or scattered. To this, Chief, DB, [redacted] replied that the documents were not being allowed to disintegrate or scatter, that they were first being screened for security and intelligence value, and that duplicates and material of no security value were being turned over to the Library of Congress.

ACH,DB to  
ADO  
17/1/47

The functions of Documents Branch had been set down as follows in the budget presentation of 17 January 1947:

"To receive foreign documents for cataloging, summarizing, and translation

To prepare subject lists of accessions for distribution

To prepare extracts and summaries from documents as required

To prepare accurate translations of documents as required

To provide technical, liaison with similar activities

To dispose of documents when no longer needed."

SECRET

**SECRET****SECURITY INFORMATION**

ADO to  
ICAPS  
2/4/47

On 2 April, the AD/O proposed to Chief, ICAPS amendment of DB's functions to allow the abstracting of current foreign periodicals, requesting that OCD effect temporary loan of such periodicals from Library of Congress and other sources. The proposal called for cooperation and advice from ORE on requirements and reporting format.

ABED to  
ADO et al  
17/4/47

Approval of this plan was forthcoming through the Assistant Executive Director on 17 April, providing that the periodical coverage would, for the present, pertain only to the USSR and Far East.

Publication of Periodical Abstracts actually began on 2 April 1947, under the customary DB format. This style was discontinued on 23 June after only five issues. Resumption came in July, with production of "Scientific abstracts," and "General abstracts." The first issue under this plan was Scientific No 1 on 6 August 1947. This series still continues, the last issue of 1951 being No 185. The "General" series started publication on 12 September and continued as an exploitation feature for a little over a year, being discontinued on 9 November 1948, after 21 issues, in favor of information reports. "Periodical Abstracts" differed from the original proposal in that they are published in card-cut form, eight to a page, with about 120 entries in the average issue. Subject to suspension of publication on at least two occasions, the Scientific Abstracts have been continued by popular demand.

The joining of the War Department's Special Document Section and the German Military Document Section's functions to Documents Branch signaled expansion for the organization on 30 June and its redesignation as Foreign Documents Branch. Reorganization was effected with an approved T/O of 250, but with only 22 persons available for transfer from the Army units, the working strength of FDB was only brought to 102.

Against this were the added functions inherited with the two units: the continuation of the USSR railroad surveys, emphasis on ICF, and the cataloging of GMD information for the intelligence catalog.

## SECURITY INFORMATION

Ex Div to  
Ch, ICAPS  
et al  
30/7/47  
ADO to  
DCI  
5/8/47

As the result of a survey of DB operation conducted by ICAPS, on 30 July 1947 the ADO was advised to take steps to transfer captured documents of no technical, scientific or intelligence value to the historical divisions of the services; to discontinue accession list publication, to arrange for bibliography publication by machine records, and to establish a program for the Documents Branch exploitation of foreign documents in response to detailed requirements and priorities ("to be established through OCD").

In his reply the AD/O recommended either that FDB be authorized to arbitrarily dispose of documents among Army, Navy and Air Force, or that an interservice ad hoc committee be appointed by the JCS to determine their disposition. "Discontinuance of accession lists, other than "Special" lists on USSR information, was under study, machine recording of bibliographies was not a function of OO." The program relative to FDB requirements and priorities was already being prepared by OO and OCD.

Rough  
draft  
memo  
"Dynamic  
25X11A.....  
11/7/47  
(ref  
AD/CD  
4/8/47)

The generation of requirements through circulation of the accession lists had for some time been recognized as unwieldy and slow. With this in mind, [ ] proposed a "Dynamic Approach to Document Exploitation" which would employ a more efficient use of the vast amount of documents and the trained personnel for the processing and evaluation. He proposed that a detailed over-all plan of requirements on the USSR and Far East be drawn up by ORE; that intra-area priorities be assigned for basic information; that accession lists of captured documents be discontinued; that accession lists of only current material be issued, and that FDB undertake as a basic program the development of information from the ORE requirements and the priorities as established. He stated that the basic program would not handicap action on current requirements but would "provide a sound foundation and a constructive, logical approach to the exploitation of foreign documents."

**SECRET****SECURITY INFORMATION**

AD/CD to AD/O 1/8/47 Indication that the proposals had found favor in at least OCD was received in the 1 August memorandum of the AD/CD which stated that action on all but the publication of current accession lists rested in the present authority of OO, ORE and OCD. Regarding the establishment of over-all detailed requirements, OCD indicated that such a survey would be made. FDB's operations and service to the other offices progressed to such an extent that by 17 December the ADO was able to inform the AD/CD that because of the receipt of large numbers of requirements from ORE and receipt from OCD of the "Estimates of Intelligence Target Potentials," FDB had sufficient information to warrant cancellation of the still-pending survey.

ExDir to State et al 19 May 47 In May, a CIG move had been made toward coordination of foreign press exploitation among the IAB agencies, the Executive Director, [ ] proposing a study be made in the interests of efficiency and economy.

ADO to DCI 25/6/47 [ ]

ExDir to ADO 3/7/47 It was pointed out that USSR provincial papers contained much industrial installation information not available in the Soviet metropolitan press and that [ ] received certain of the provincial newspapers which were not available in the US. The reply to this proposal was the authorization for FDB to cooperate with the [ ] in processing fifty percent of the material and that the extracts and translations resulting from FDB and [ ] work would be exchanged. The operation was started ~~without delay~~ and FDB published its first Soviet Press Extracts on 7 September 1948.

AD [ ] to ADO 28/8/47 Following informal liaison, OSO on 28 August 1947 requested FDB assistance for translation of approximately 120 pages total per month of Russian, Polish, Finnish, Japanese, French, Spanish, and Italian documents. The personnel shortage of the branch was considered in relation to possibility of seeking a "ceiling" raise for recruitment, AC/P&C/CO 8/9/47

**SECRET**

SECURITY INFORMATION

AC/FDB  
reply  
10/9/47

and the establishment of a "translation pool" was suggested. However, Acting Chief [ ] suggested that the requirement was not currently arduous and that should the demand increase to such an extent the suggested increases could be requested. He recommended approval of the request.

ADO to  
ExAAM  
21/11/47

However, within weeks (?) the demand for increased translation for requesting CIA offices resulted in proposals for establishment of a Translation Service Division in the FDB organization. The new division was finally approved in the 26 December T/O and authorization for the service was carried in Administrative Instruction 50-14. The reorganization expanded FDB to a total T/O of 265. (See Section C and G). This unit continued as a division of the branch until August 1949, when it was eliminated in reorganization. Its functions were distributed throughout the area branches, allowing for broader and more efficient use of the personnel.

[ ]  
"for Record"  
15/1/48

With the heavy work load increasing, the matter of priorities to be set against the requests in hand was a branch problem. In January 1948 steps were taken by OO and OCD to have the requesters survey their requirements and to assign priorities for their completion; to set up a definite priority system for incoming requirements on a graded basis for FDB guidance, and to effect closer coordination between OCD and FDB in the acceptance of requirements. A suggested panel system for establishing priorities was not acted upon pending further study. This matter was never officially resolved, the priority schedule for the FDB workload being by necessity assumed by the Chief, FDB.

AD/O to  
ExAAM  
5/2/48

[ ]  
reply  
6/2/48

Early 1948 found the personnel shortage of the branch critical. With a strength allowed at 269 and a current ceiling of 225, the branch roster on duty held only 120. This was finally called to

**SECRET**

**SECRET**  
SECURITY INFORMATION

Ch, FDB to  
AD/O  
25/2/48

the attention of the Executive for Administration and Management by [ ] AD/O, seeking alleviation of the recruitment situation. There were losses, mainly through natural personnel turnover and attrition, from the branch but the exchange of memorandums during the month terminated in a study by Branch Chief [ ] in which the personnel status and history of personnel actions was fully detailed.

Reference  
and  
recollection

The situation was aggravated by the establishment at the turn of the year of a "translation pool" in which provisionally cleared personnel awaiting final reception into CIA could be employed. The pool was satisfactory in its ultimate operation and aided considerably in the production for FDB requirements which could be applied to its "restricted" level. This later was applied to the employment of clerical and editorial help, assisting substantially in retaining from other than CIA employment those persons awaiting full security clearances.

In April, a broadcast address of Admiral Zacharias, inspired [ ] recommendation that more complete exploitation of overt foreign publications be undertaken.

AD/O to  
EXAM  
23/6/48

The changes suggested in the organization chart for OO of 23 June 1948 include "approved changes in the statements of functions included thereon," to the effect that FDB functions read:

"Exploits foreign language documents, including current foreign periodicals and the foreign press, for intelligence information."

Compo  
records

Previously, such statements had read first, "exclusive of the press" and later, "the Soviet press." On 28 July, FDB published its first Finnish Press Extracts, and on 30 July followed with a Chinese Press Extracts, Korean, Indochinese, and Indonesian following later -- all continuing until about 30 March 1949 when the press service demanded faster coverage.

**SECRET**

## SECURITY INFORMATION

Ex Dir to  
AD/O  
23/3/48

In the meanwhile, the subject of bibliographies of Soviet periodicals had been proposed and conferences between State Department and CIA offices resulted in its implementation in late March with a memorandum from the Executive Director. Production was started in April and the first issue was disseminated on 12 May. Publication of the bibliographies continued until 29 March 1949, a total of 656 bibliographies being published in that time. Production of these unclassified bibliographies, was taken over by the Library of Congress.

Arrangements were completed in May by which all USSR publications received would be channeled to FDB by the State Department. The branch also was contemplating the processing of Scandinavian and Near East periodicals. A trial monitoring of the domestic foreign-language press had resulted in a negative report.

In May, FDB acquired the Sunshine Project from ORE. The project was officially discontinued as of 30 September. (See Section D)

The need for liaison with "Eucom," Germany, in relation to FDB's exploitation needs had been considered early in the spring and Branch [REDACTED]

and [REDACTED] left for the theater on 11 July. This team found that about 200 tons of documents of interest to Washington agencies were available in the theater and that of these at least 20 tons was valuable to the intelligence operations of FDB. The team returned in mid-September and reported their findings and recommendations.

A 15 June conference between FDB and ORE paved the way for better understanding of requirements and for closer liaison between the operating levels. A simplified procedure for forwarding requests from ORE direct to FDB was also discussed and

25X1

25X1

SECRET

resulted a month later in this system being put on a trial basis. Work produced was to be disseminated by OCD. This trial proved the efficiency of the direct request and the method was later assumed by other CIA offices.

With the integration of GMDS in June 1947, the production of Intelligence Catalog cards had been taken over by FDB with a team assigned for this purpose to a designated area of GMDS, AGO, in the Pentagon. This effort was continued, but in July a year later a survey was conducted to determine the use and value of the cards to the participating agencies. The report from this survey was positive and the effort was continued into the next year when the screening effort was considered of decreasing value. The team was withdrawn in early May and the last publication of cards was made in late May.

ExA&M  
29/7/48

Three new divisions were added to the branch in July: Near East/Africa, Eastern Europe, and the Documents Screening and Reference Divisions, expanding the branch area coverage and providing for more efficient processing of documents received. (See Section C)

ADO to  
Ch, ICAPS  
29 Oct 48

In November, because of ORE interest in OSO documents, arrangements were made and later approved by the AD/O and AD/RE for translations requested through ORE. When completed in FDB the translations were forwarded to OSO and assigned as special translations for ORE. Discussions with ICAPS were also held in November 1948 regarding an IAC ad hoc committee to consider a centralized translation service. A memorandum to Chief, ICAPS on 29 October outlined the FDB study of this proposal and outlined the FDB potential, under its fixed T/O, in relation to the requirements and possible demands of the IAC agencies.

AD/O to  
ExDir  
20/12/48

In December, the value of FDB's translation pool was questioned requiring the branch to justify why this activity should

SECRET

**SECRET**  
SECURITY INFORMATION

DCI  
7/1/49

be continued as peculiar to FDB. A memorandum justifying the pool as of value in the employment of personnel awaiting clearance, and that otherwise such personnel would be lost because of the delay in security procedure, was successful in that on 7 January 1949 the DCI approved the continuation of the linguist pool in FDB.

By agreement with the IAC, an Ad Hoc Committee on "Foreign Document exploitation" was established at the final meeting of the Ad Hoc "Committee on Translations" 11 April 1949. The latter has recommended against a Central Translation Service.

The Exploitation Committee met weekly from 11 April to 25 July 1949. The conclusions of this interdepartmental Committee were as follows:

- a. The Central Intelligence Agency should assume responsibility for over-all coordination of exploitation of foreign language documents and to perform such exploitation centrally as may be necessary to meet the requirements of the IAC agencies.
- b. A permanent Foreign Document Exploitation Committee should be established in order to draw up lists of publications required for centralized exploitation; to determine the priorities for exploitation of publications by subject matter and area; and in order to generally assist the Director of Central Intelligence in the exploitation program.
- c. Each IAC member agency may retain, at its discretion, a translation and/or abstracting unit for the purpose of translation and/or abstracting special interest material. The Director of Central Intelligence would be informed of such exploitation in order to prevent duplication of effort, and the results of this work would be made available to CIA upon request.

**SECRET**

## SECURITY INFORMATION

d. A National Security Council Directive or such other instructions as may be considered appropriate should be formulated embodying the recommendations outlined above. A draft of a National Security Council Directive is attached herewith.

No final action was taken on the proposed NSCID.

The exploitation of the foreign-language press had met with favor in the consuming agencies as FDB expanded its coverage. However, the publication of extracts in a collected form over a period of weeks between original exploitation and publication constituted a great time lag. Upon request of consumers, particularly ORE, measures were studied for correction of this delay.

The result took form in what FDB termed its "High Speed Press" procedure, designed to process, exploit and publish daily press material within 48 hours of reception of the original material in the branch. This operation is continuing, with modifications, and 15,406 reports have been disseminated on a "current" basis.

Compilation or collation of information has also been employed and extended to exploitation of periodicals and other foreign language sources, utilizing to the greatest efficiency the intelligence training as well as the language ability of the division personnel, while serving the consuming offices and agencies in a more expeditious manner.

With physical relocation of the branch on 1 August 1949 from

[REDACTED]

[REDACTED] the unit was at the same time subject to a T/O cut and revision. Reorganization was effected and approved in late August (See Section C) and its basic form is still maintained.

For translation of covert material, a "Special Series" of translation service was inaugurated early in 1948. This provided for the direct transmittal of the raw material to FDB from the

25X1

25X1

**SECRET**

## SECURITY INFORMATION

requesting office, its processing under special security provisions, and its direct return to the requesting office.

The coordination of translation and foreign-language exploitation throughout the IAC had been gradually centralizing in FDD for more than a year and the number of cooperating agencies submitting monthly reports was finally sufficient, in late summer of 1949, to develop the service as originally planned. In October 1949 the branch published its first Consolidated Translation Survey, informing the IAC agencies of all translation/exploitation work completed or initiated during the preceding month. This service continues in conjunction with the operation of a central Document Exploitation File in which all translation reports are cross indexed and by which special inquiries and requirements are answered by the division (See Section F). As of 1 January 1952 this file included an estimated 70,000 cards cross-indexing approximately 20,000 different entries.

FDB to  
0  
12/48

The outbreak of Korean hostilities in June 1950 resulted in conferences concerning FDD's role in relation to captured documents. One was held with representatives of the Army, Navy and Air Force on 30 June in which the division's part in an emergency was discussed. In anticipation of such emergency, studies had already been made at DCI direction and such plans were on file.

In August 1950 a survey of CIA offices relative to their requirements for classified and unclassified translation projects was initiated. Findings from this survey revealed that in the classified category alone approximately 96,000 pages would be required against a division processing potential of only 20,000, and that the requirements for unclassified translation would be approximately 40,000 pages.

**SECRET**

~~SECRET~~

## SECURITY INFORMATION

In November an FDD proposal to establish external facilities for unclassified translation was approved by the Projects Review Committee. At the start of the new year the Projects Review Committee approved an addition of 82 slots to the division T/O to handle classified translation needs of CIA offices. (See Section C)

A survey of the status of publications procurement in the Near East was undertaken by Chief [ ] between 20 October and 25 December 1950. The report of his findings was detailed and resulted in closer liaison and understanding concerning the peculiarities of Near East and African publication and procurement techniques.

25X1

The implementation of greater translation service by the T/O increase and authorization for contract unclassified work showed considerable results in 1951.

In April, through arrangement with the interested offices, the abstracting of SOEB enclosures was initiated in order to decrease the number of requests for translation/exploitation against such documents. This abstracting continues, only slight operational interruptions occurring, none of which were within OO. That the abstracting has been either sufficiently complete or the information in the documents has been of limited interest is indicated in the infrequency of requirements for further translation of the documents.

Acquisition of more space in May saw the division physically expand into a fourth wing of [ ], providing for a sealed "restricted" area for the division's provisionally cleared language pool.

25X1

On request of ORR a Western European Branch was authorized as an addition for FDD's expansion of area coverage and this branch was activated 30 June. June also saw the completion of the USSR

~~SECRET~~

**SECRET****SECURITY INFORMATION**

railroad systems project. This project, inherited by the division with SDS in 1947 covered 41 systems on information largely derived primarily from captured German documents, later augmented by more current information. A similar project on satellite systems was immediately undertaken and is progressing.

A two man linguist team was sent to Japan on 29 July and returned in mid-September after a survey in which they covered World War II and current Korean captured documents, current Asiatic mainland publications received in Japan, Japanese repositories, and FDD liaison with TIS, FECOM. A detailed report was filed upon their return.

In view of the continued strain occasioned by world events, Chief, FDD, called a meeting of IAC representatives in July relative to the procurement of foreign publications in the event of the outbreak of war. Conclusion of this conference was agreement to an arrangement whereby each agency was to supply FDD with a priority list of needed titles for FDD exploitation which would constitute a guide for covert field collection.

Another memo proposing an NSCID covering FDD activities was submitted to the Assistant Directors and the DCI for their decision. The year closed without action on this proposal.

During August the publication of transliteration tables approved by the CIA IAC transliteration committee was finally turned over to FBIS for unclassified publication and dissemination.

The year showed increasing development of reporting techniques on the part of the area branches and the issuance of special types of collated, factual reports which were well received by the consuming agencies.

**SECRET**

**SECRET****SECURITY INFORMATION**

Relations with other CIA units became closer, with indoctrination tours for new personnel of OSI, OCI, ORR and OCD through FDD.

New guide requirements in bulk form were received from ORR and Department of State as the result of conferences, studies and reviews of existing requirements.

STATSPEC

Personnel were loaned to other offices for special projects, and one linguist was loaned  work for a one year period. Liaison on the operational level increased, specially between OCD, OSI and ORR, and as the year ended arrangements were being completed for closer liaison between FDD and the covert offices.

Training of FDD personnel was formalized during 1951, many taking language courses locally and at nearby universities, and courses in elementary Russian, Arabic and Hebrew were given in the division. Appointees from FDD graduated regularly from the Strategic Intelligence School of Army's Intelligence Division and one from the Naval Intelligence School.

The year 1951 found the working potential of the division with a total of 68 languages which could be translated into English. Of these, 39 could be used for "reverse" application (English into the foreign) and 25 of these languages could be reverse translated with a degree of native perfection.

Personnel recruitment increased with language positions nearly filled during the year and the prospects for additions in the clerical field optimistic.

Special Divisional Functions and Problems

The tentative T/O of 10 June 1947 expanded to include a Documents Source Survey Division.

**DOCUMENTS SOURCE SURVEY**

This division was to "survey world-wide sources of foreign documents and to determine existence and availability of those of actual or potential intelligence value." DSSD was responsible for keeping abreast of foreign publications lists, preparing a periodic review of documents of intelligence value, and meeting requirements for intensive subject or area surveys on document sources.

During October 1947, governmental and academic institutions were surveyed as to holdings of documentary material of value of FDB. This activity has expanded to include research foundations and private enterprise.

AD/O to  
Ex  
29/8/49  
T/O file

With reorganization of the Foreign Documents Division, 24 August 1949, DSSD assimilated the Screening and Reference Section to become the Documents Control Division. Through these sources about 2000 foreign-language documents reach FDB daily for screening, either on loan or for retention.

The difficulty of procuring USSR publications created the necessity for surveys of domestic and "third country" or "peripheral" procurement of these documents.

State to  
AD/O  
18/11/48

On 6 July 1948, DSSD initiated its "SOCHI" project whereby Chinese consular posts in the eastern USSR were to be utilized as collectors of provincial USSR serials. On 19 August this plan was submitted by the Ad/O to the Special Assistant to the Secretary of State for Research and Intelligence whence it was forwarded to the US Embassy in Moscow for action. The Chinese embassy in Moscow agreed to the proposal,

the plan was implemented, and the first shipment of publications arrived in Washington in February 1949.

DCI to  
State  
24/10/49

Publications were received from this project until November 1949 when it phased out due to the political changes wrought by the Chinese Communist victories. Publications received from SOCHI totaled over 1,100 and covered titles of 13 newspapers and two periodicals from the eastern USSR.

ACH, FDB to  
OSO  
14/6/49

The Commander, US Naval Forces, Germany, being in a position to procure certain publications of interest to FDB, was informally requested to proceed with such action in March 1949. Arrangements were formalized between OSO and FDB for the commander to be provided with 10 cartons of cigarettes per month to effect such procurement. Naval channels provided the transmittal of materials to Washington.

OSO to  
ACH, FDB  
27/6/49

The first shipment of 38 USSR periodicals and one Soviet-published book was received 3 May 1949. Subsequent shipments were much larger and also included Sovzone Germany publications. In 1949 the new operation showed 124 receipts, but 1950 counted 3,223, and 1951's totaled 1,731.

ACH, FDD to  
AD/O  
20/1/50

The willingness of the [ ] to make their continuing Chinese facilities [ ] (in China) available was cited by the State Department. Accordingly FDD on 20 January 1950 requested that action be taken to avail CIA of such

**SECRET**

**SECRET****SECURITY INFORMATION**

In June of 1949 a special arrangement was made via CIA Library with the Library of Congress to permit FDB to receive directly on loan current receipts of selected number of USSR periodicals. This arrangement was modified in 1950 to provide a wider coverage of the Library's accessions of Slavic language serials. This source has been of particular value in providing the Division with a number of Slavic publications not available through normal subscription channels.

DCD's activities have included the screening of numerous collections among which were the following: large collection of Chinese Communist publications held by Yale University was screened and numerous items of intelligence interest were obtained on loan to FDB; the Dredner Bank records held by GMS, AGO, yielded 200 items which were microfilmed before the collection was returned to Germany; similarly, 300 items were screened from the Berlin-Dahlem Library collection in GMS for retention in FDB.

In the course of four years, 1948 through 1951, DCD has processed into the division 673,742 foreign documents through the cooperations of the following agencies: State 421,821, Army 67,724, Navy 8,716, CIA 127,962, Library of Congress 41,530, Smithsonian Institution 5,989.

**PUBLICATIONS**

The editorial and publications functions of FDB, descendant from PACMIRS, had always been a completely integral part of the operation up to the point of dissemination. With integration into CIG, the reproduction services for illustrative material was transferred from the War Department facilities to the CIG without delay in publication.

Noteworthy followup by WDC/CIG of previous War Department commitment was the "Yellow River" project for the White House, embracing the reproduction, binding and publication of three volumes.

**SECRET**

**SECRET**  
**SECURITY INFORMATION**

The Publications Section of WDC had been equipped with two mimeograph and one ditto machine, a heavy machine stapler, a circular collating table, and a wealth of drafting equipment -- everything necessary to publish the average product of WDC (DB).

The section's T/O provided for draftsmen and clerical help for typing and machine operating. When SDS and GMDG were taken over by DB in June 1947, three more mimeograph machines and three ozalid machines were accepted in the transfer, as well as 12 electric typewriters.

These added facilities were sorely needed in the face of new demands raised for increased production of ICF cards.

It was this added demand for reproduction which delayed transfer of DB's reproduction equipment and function to PMA, Reproduction Division, in the summer and fall of 1947. The transfer was completed in early January 1948, and FDB turned over its first requisitions to Reproduction Division on 20 January.

**EXPLOITATION/TRANSLATION COORDINATION**

Ch, FDB  
to AD/O  
20/9/48

From its early days, the coordination of all government translation and foreign documents exploitation had been held as a project for FDB. Some preliminary liaison had been effected in the fall of 1947 resulting in FDB receiving monthly reports of ID Translation Section's projects. Within a year six Army, Navy and Air units were cooperating and others were interested.

AD/O to  
Ch, FDB  
3/9/48

It was not until September of 1948, however, that the coordination effort received real impetus. A 3 September memo of the AD/O on the Functions of FDB stated: "Coordinates with CIA offices and other government agencies in the continuous exploitation of foreign language material in order to meet established requirements."

**SECRET****SECURITY INFORMATION**

25X1

In a reply on coordination, [redacted] noted that his branch planned to carry out this function by "collecting, carding, crossfiling all information on translations anticipated, in progress or completed by government agencies cooperating" and operating a central file for the information of the IAC agencies. He also proposed the monthly publication of a "Consolidated Translation Survey" in which would be listed all the recorded translations started or completed during the preceding month.

An authors' file was the start of a "Central Coordination File." The addition of another clerk to the Records Section early in 1949 provided additional support and a start was made on expanding the file into a cross-indexed system of all translation work reported.

DCI to Com  
of IAC  
16/3/49

DI, Army  
to DCI  
25/4/49

The effort was further inspired with a concurrence on 25 April 1949 of the Army, Navy and Air department intelligence chiefs in response to a DCI proposal that translation coordination rest with CIA/FDB.

With establishment of the Records Section in the Reports Division in the August 1949 reorganization of the branch, the additional available personnel of the new division provided for greater flexibility of assignment and orderly establishment of the Document Exploitation File in its complete cross-index form was achieved.

It also paved the way for the monthly publication of the IAC translation-exploitation efforts. The first listing was issued as regular [redacted] in October, covering the September reports recorded. The next listing was published in November as a cover publication under the title Consolidated Translation Survey No 1. To date,

25X1

**SECRET**

**SECRET****SECURITY INFORMATION**

27 surveys have been published, and the Document Exploitation File has well proved its value to the government. In the last six months of 1951, 2,553 inquiries concerning exploitation were received, as a result of which 412 cases of duplication were prevented.

The DEX file now contains approximately 70,000 cards cross-indexing more than an estimated 16,000 entries of translations/exploitation work engaged in by component foreign-language units of the IAC as well as additional translations of intelligence value "picked up" from other governmental and institutional lists. The DEX file and publication of the CTS up to 1 January 1952 was operated without the assignment of any specialized personnel exclusively to its maintenance.

**LIAISON**

The problems of liaison, to sufficiently maintain efficient operations, was an increasing one as the division developed. From the time of the integration with CIG until early in 1951 liaison was conducted through O/CD.

From December 1946 to June 1947, the former WDC relationships were maintained under Administrative Instructions of that period. It involved selection of translation material, briefing of DB personnel on requirements, and pre-exploitation screening and evaluation of the captured documents received by the branch.

This policy was discontinued in November 1948 under instructions that all outside-CIA liaison would be adequately recorded by the branch liaison officer.

FDD Memo  
#9  
23/3/49

To more firmly establish operational liaison on the records, FDD Memorandum No 9, on 23 March 1949, stipulated the following:

Adm Inst  
50-17/1

(1) Closer liaison is desirable between FDD intelligence officers and their counterpart analysts of the IAC;

(2) Such liaison would be cleared through the branch liaison-control officer who would also receive a report of liaison results;

(3) Certain limitations involved in operational liaison were noted.

The liaison problem was finally put in more efficient order with the issuance on [redacted] which authorized that the establishment and maintenance of liaison with the Departments of State, and Defense was the individual responsibility of division chiefs. FDD procedure was readily applicable to these regulations. The practice required:

- (1) Observance of CIA security regulations
- (2) Avoidance of undesirable duplication of liaison
- (3) Observance of control procedures of the agencies involved
- (4) Registration with OCD of materials and documents interchanged
- (5) Maintenance of up-to-date records of liaison, and reporting same regularly to OO.

This matter was simplified on 6 April 1951 when OCD asserted its function and responsibility to disseminate and record.

## SPECIAL PROJECTS

Jan Morep  
8 Feb 51

In January 1951, Navy and Air Force presented FDB with a project unique to its operations. This required the translation from English into 23 languages for composition into [redacted]

25X1

Similar work was done later through the year for Training Division in the preparation of training manuals in various languages. This work still continues as requested.

SECURITY INFORMATION

The location of the Division at 14th and L Street, "half-way across town" from the main Agency area, had been a handicap discouraging close operational liaison. Transportation was all but restricted to the use of one car, chauffeured by a member of the branch message center. Such service was inadequate.

Removal of the Division to [REDACTED]

25X1

[REDACTED] almost doubled this aggravation. Inclusion in the Agency shuttle-bus schedule was cancelled after a short time and use of a single car restricted personnel intra-Agency communications to a point of poor efficiency.

The generally remote location left branch personnel with little recourse to poor public transportation service, but perhaps eventually contributed to the general morale as "car pooling" developed better acquaintance among the employees.

The resumption of shuttle-bus service was announced at the end of 1951.

## NSCID ON EXPLOITATION OF FOREIGN DOCUMENTS

A proposed NSCID No. 8 on foreign document exploitation was first drawn up on 13 January 1948 and submitted to ICAPS for discussion with an ad hoc committee of the IAC. As a result of Department of Army objections, a new draft was prepared on 3 March 1948. This was submitted to the Standing Committee of the IAC. However, State, Air and the JCS wanted to insert a provision to the effect that any exploitation would be done only "if agreed upon by the interested agencies." With such a provision an NSCID would have served no useful purpose and as no agreement could be reached in the Standing Committee, Chief, ICAPS on 5 April 1948 recommended to the DCI that the proposed NSCID No. 8 be abandoned. This recommendation was approved.

By September 1948 several of the IAC agencies were showing an interest in the idea of a central translation service, to be undertaken by CIA. On 3 September 1948 Chief, ICAPS presented the problem to the Standing Committee members of the IAC. An Ad Hoc Committee on central translation was established and on 11 April 1949 agreed that a central translation bureau was impracticable due to the desire of each agency to maintain its own translation section. However, it also agreed that "a common service of exploitation of foreign language publications would be desirable." As a result an Ad Hoc Committee on Exploitation of Foreign Documents was established. This committee worked through the summer and finally drafted a proposed NSCID on Exploitation of Foreign Language Publications. This was submitted by Chief, ICAPS to the Standing Committee Members of the IAC on 26 September 1949. Army and Navy requested changes in wording and so a revision of the proposed NSCID was circulated on 25 October 1949. At the request of State a small change in wording was made and another revision circulated on 18 November 1949. Army formally dissented to this revision and suggested changes. State also requested further changes. On 6 December 1949 another revision was circulated. This time Air requested changes. Unable to obtain agreement of the IAC agencies, the Chief, ICAPS discontinued further efforts in December 1949.

On 29 March 1951 the AD/O took the initiative to reopen the question in a memorandum to AD/IC requesting that the problem be taken up with the IAC members. On 1 May 1951 a meeting was called of working-level representatives of the IAC. Air Force representatives presented a request for a change in wording of the CIA draft that could not be resolved at that meeting. A few days later Chief, FDD and Air Force representatives met and agreed upon changes amending one paragraph. Following this the Advisor for Management and the Assistant Deputy (Administration) objected to the entire proposal. A paper was then presented on 23 July 1951 outlining the entire problem to the DCI, DDCI, DD/P, DD/A and all Assistant Directors with the recommendation that a proposed NSCID be presented to the IAC. Approval of this paper was withheld pending a survey by the Senior Consultant to the DCI, [redacted] of the Office of Operations. After his survey on 13 November 1951 [redacted] recommended that the proposed NSCID forwarded with the 23 July 1951 paper be submitted for discussion with the IAC. Since this recommendation was among those approved by the DDCI and the DDP on 5 February 1952, action is currently being taken by OIC and FDD to coordinate a revised draft with the appropriate representatives of the IAC agencies as a preliminary to formal discussion of the subject by the IAC.
