Trans. of Prikladnaya Geofizika (USSR) 1958, no. 19,  
p. 57-108. (Abstract available)

DESCRIPTORS: \*Geophysical prospecting, Recording  
systems, Resistance (Electrical), Rock (Geology).

Methods are presented of processing bilateral dipole  
sounding curves based on theoretical calculations for the  
simplest idealized sections. As the experience recently  
gained in various geological provinces of the Soviet  
Union shows, these methods prove to be efficient under  
favorable conditions, i.e., when the electric resistivity  
of rock is rather persistent. In more complicated cases,  
interpretation of bilateral soundings often involves  
(Earth Sciences--Geology, TT, v. 11, no. 4) (over)
