Trans. of Italian patent 480,404, cl. XVIII, appl. 10 May 51, granted 29 April 53, printed Mar 54.

The invention is characterized in that the student desks are electronically connected to the teacher's desk so the teacher can successively check the work of the individual students. The equipment provides auxiliary apparatus such as: circuit boards, technological boards, and oscillographic devices designed for practical teaching.
