Rough draft trans. of Avtomaticheskaya Svarka (USSR)
1955 [v. 8] no. 6, p. 3-18.

The reasons for brittle fracture of welded structures
are investigated. The conclusion is derived that in-
creasing the cross section of components is not effec-
tive in preventing this type of failure. Ways of increas-
ing structural strength without the use of additional
metal are investigated. (Author)
