p. 317-319.

DESCRIPTORS: *Gases, *Moisture, Determination,
*Volumetric analysis.

After a critical consideration of the current methods of
moisture determination of gases, a new method is de-
scribed which is based on the reaction between magnesium
nitride and water resulting in the formation of ammonia,
and which makes it possible to carry out sufficiently
accurate determinations by titration. The particular
virtue of this method, which requires less time, is its
