Rustamov, Kh. R., Fatkulina, L. G., and
Nabikhodzhayev, S. N.

CATALYTIC ABILITY OF BIFUNCTIONAL CATION
EXCHANGERS. [1960] 5p. 5 refs.
Order from LC or SLA ml\$1.80, pb\$1.80 60-16958

Trans. of Uzbekskiy Khimicheskiy Zhurnal (USSR)
1959, no. 1, p. 39-42.

The kinetics of ethyl acetate hydrolysis in the presence of espatite KU-1, and also in the presence of different samples of this cationites with a partial replacement in those of the hydrogen-ion through the ion ammonium-triethylbenzyl was studied. Only the strongly acid functional group (sulfoacid group) shows a catalytic ability, in neutral or little acid medium, in the bifunctional cationites. The introduced complex ion of ammonium-triethylbenzyl diminishes the catalytic ability of the remaining, nonsubstituted hydrogen ions. (Author)
