<p>DESCRIPTORS: *Flour, *Bread, *Bakery products, *Cellulose ethers.</p>	<p>(Food, TT, v. 10, no. 7) Office of Technical Services</p>
<p>The invention involves a method for the improvement of flour or of dough for the preparation of bread, cake, or other baking products, by the addition of one or more cellulose derivatives which swell in water or watery solutions, preferably cellulose ethers; these cellulose derivatives are to be added to the flour or dough before or during the mixing in quantities of at least 0.25%, but preferably about 1% or 2% of the weight of the flour mixed in the dough.
