Trans. of Revue Française d'Études Cliniques et  
 Biologiques (France) 1958, v. 3, no. 6, p. 558-584.

An immunological study of 40 serum samples from 19  
 patients with disseminated lupus erythematosus re-  
 vealed the presence in more than half the sera of anti-  
 thrombocytic antibodies. The presence of anti-  
 leukocytic antibodies was demonstrated by precipitin  
 reactions and complement fixation. The substance in  
 LED serum reacting with DNA is an antibody. The  
 specific precipitation reaction and fixation of comple-  
 ment establishing the presence of these antibodies was  
 present in all patients who had received little or no
