An account is given of a pumpless soap emulsion lubri-  
cation system for piston oxygen compressors using  
the oxygen pressure itself to feed the emulsion. Con-  
sideration is given to prevention of sediment forma-  
tion in the emulsion, and to valve overhaul and other  
maintenance measures. The oxygen plant is used in  
production of oxygen for open hearth furnaces, for  
welding, and for the cutting of metals.
