Trans. of Glav[naya] Geof[izicheskaya] Obs[ervatoriya]  
Leningrad. Trudy (USSR) 1957. v. 69 [131] p. 36-40.

The convective power is more completely character-  
istic of convective motion than the energy of instability,  
usually used by weather services in forecasting con-  
vection. A method is worked out for determining the  
power of convection from aerological observation  
(temperatures and winds), and the relationship is in-  
vestigated between the convective power (determined  
from data of morning sounding) and the maximum in-  
tensity of convection in day time.

<p>DESCRIPTORS: *Vinyl chlorides, Copolymerization, Polymerization, *Acrylic acids, Acids, Esters, Benzoates, Polymers, Molecular weight.</p>	<p>Office of Technical Services</p>
<p>The copolymerization of vinyl chloride with methyl-, n-butyl-, n-octyl methacrylates and vinyl benzoate was studied. The rates of the copolymerization of vinyl chloride with methacrylates and the molecular weights of the polymers in all of the corresponding monomers are less than with acrylates. These values (Chemistry--Organic, TT, v. 7, no. 10)                      (over)</p>
