Trans. of Zhur[nal] Fiz[icheskoy] Khimii (USSR)
1959, v. 33 [no. 4] p. 863-868.

The thermal oxidation of benzene by a mixture of
oxygen and water vapor has been investigated. It has
been shown that the latter exerts a specific effect on
the course of the reaction, consisting in an increase
in yield of phenol. A mechanism has been proposed
for the action of water vapor which has been confirmed
