no. 11, p. 615-622.

DESCRIPTORS: *Couplings, *Flanges, *Pipe fittings,
Bolts, Stresses, Pressure, Mathematical analysis.

Formulas are determined for calculating the stresses on a pipe flange under an axially symmetrical strain. This stress is produced on the one hand in a radial direction by the internal pressure prevailing in the pipe and, on the other hand, by the longitudinal forces transmitted in the bolt area. The bolts take up the internal pressure in the pipe longitudinally and also the tightening force required in each case. The equations pre-
